Welcome by the Managing Director

Glion Institute of Higher Education has delivered excellence in hospitality and luxury management education for more than 60 years. Our accredited undergraduate and graduate degrees are internationally respected and our alumni are some of the most respected industry leaders in the world.

At Glion, we provide a unique educational experience that will hone your adaptability, leadership and business skills so you are ready to shine within today's complex and fast-moving global marketplace. Every student will go through a process of rigorous leadership development over the course of their studies, which builds on their strengths and nurtures leadership skills and competencies.

As a Glion student, you will receive practical and theoretical education that undergoes continual updating and renewal to ensure it stays relevant to current industry trends and demands. Our expert faculty work closely with our industry partners to develop the course content, while our Advisory Board comprises some of the most influential figures in the hospitality and service industries today.

Why choose Glion?

- **Academic excellence:** our commitment to small class sizes ensures a highly personalized and supportive learning experience, while the quality of our academic curricula saw us awarded five Stars (Excellent) by the QS Stars university rating system. As a school, we share our NECHE accreditation with institutions such as Yale and Harvard.
- **Industry exposure:** throughout the past six decades, we have built an exceptional array of industry partnerships in hospitality and beyond. As a student, you will be able to leverage these partnerships to expand your knowledge of industry trends, build your network and prepare for your career by attending many alumni events, conferences and company visits.
- **Engaging student life:** our Student Government Association and related student clubs, sports and ambassador programs will give you many opportunities to further develop your leadership and teamwork skills and foster a healthy lifestyle.
- **Premium Locations:** from the stunning views and Michelin-starred cuisine of Maison Décotterd on Glion campus to the contemporary Academic Center in Bulle or the mixture of history and modernity that is Downshire House in London, we are continually improving our facilities to provide the best possible learning and living environment for our students.

By choosing Glion, you are choosing an education that sets the foundations for life and provides the springboard for a successful career. You are choosing to join an academic community that will listen to and respond to your needs and a network of students and alumni that spans the globe. You are choosing to be part of the next generation of leaders.

Frédéric Picard
Managing Director

Quality and standards

NECHE accreditation

Glion Institute of Higher Education is accredited by the New England Commission of Higher Education (NECHE) previously known as New England Associations of Schools and Colleges, Inc. (NEASC) through its Commission on Institutions of Higher Education.

Accreditation of an Institution of Higher Education by the New England Commission shows it meets or exceeds criteria for the assessment for institutional quality periodically applied through a peer review process. An accredited college or university is one that has available the necessary resources to achieve its stated purpose through appropriate educational programs, is substantially doing so and gives reasonable evidence it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the New England Commission is not partial but applies to the institution. As such, it is not a guarantee of every course or program offered or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the New England Commission should be directed to the administrative staff of the institution. Individuals may also contact:

New England Commission of Higher Education
3 Burlington Woods Drive, Suite 100 Burlington, MA 01803, USA

Student Route – London campus

The Quality Assurance Agency for Higher Education (QAA) is the independent body that checks on standards and quality in UK [higher education](#). It conducts quality assessment reviews, develops reference points and guidance for providers and conducts or commissions research on relevant issues.

In spring 2011, under the coalition government, the UK Border Agency announced a requirement for all private colleges that recruit students to UK higher education to undergo a standards and quality review by QAA. A successful outcome would be essential to obtain 'Tier 4 accreditation', also known as 'highly trusted sponsor' status.

Tier 4 has been replaced by the Student Route but the accreditation remains as before.

Inquiries regarding the accreditation status by the QAA should be directed to the administrative staff of the institution. Individuals may also contact:

Quality Assurance Agency
15 Fetter Lane
London

The latest QAA report can be viewed on the [QAA Website](#).

Mission

Glion develops professionals for global careers in the world's premier hospitality and luxury businesses.

Vision

Be known worldwide for excellence as a higher education institution for hospitality and luxury business management.

Educational philosophy

GIHE EDUCATIONAL AIMS ARE:

- To provide intellectually challenging, sector-centric programs that enable students to gain competencies, knowledge and experience that will prepare them for a successful career in international hospitality, luxury, real estate and other industries encompassed by the program portfolio.
- To support vocational and academic development with specific reference to the subject being taught through a range of courses, modules and specialization electives.
- To promote an ethos of 'learning how to learn' through self-development, self-management and reflective self-assessment throughout the curriculum with the aim of fostering greater awareness of and confidence to engage in management practice.

GIHE TEACHING AND LEARNING GOALS ARE:

- Drive inclusive education
- Expand and enhance the program portfolio
- Foster a culture of professionalism and excellence
- Develop lifelong learners with a global mindset

Equal opportunity policy for students

The primary purpose of GIHE is to provide a rich and professional education for managers of the future. This objective is part of the institution's mission. To this end, GIHE is committed to equal opportunity for all its students, irrespective of religion, ethnicity or culture, gender, marital status, disability, age or sexual orientation. In its policies and practices, GIHE will seek to enhance the self-esteem of all those it serves.

The institution will seek to ensure:

- Its publications reflect the policy
- Program admissions requirements are free from unnecessary barriers
- Selection procedures are operated fairly
- Teaching and learning materials produced in the institution are free from stereotypes
- Assessment procedures are fair for all candidates and allow impartial opportunities for students to demonstrate their potential
- Services and access to them is assured

Institutional student learning outcomes

GIHE's institutional learning outcomes articulate the knowledge, skills and competencies. All Glion students should possess upon graduation, regardless of the specific program or specialization they may have completed. These statements guide Glion's academic leaders, staff and faculty in creating program and course learning objectives and in developing assessment tools for student work. These same statements also form the basis of processes for assessing Glion student learning outcomes for the purposes of measuring and enhancing institutional and educational effectiveness. The institutional learning outcomes are intended as touchstones in designing program learning outcomes and curriculum in general, which is why they are limited in number and written so the outcomes (knowledge, skill and competency) can be assessed and evidence can be given that students have achieved these objectives.

Highest level statement

A Glion graduate is a globally aware professional with highly developed ethical reasoning and advanced ability to work with others. Possessing a growth mindset allows a Glion graduate to pursue knowledge, make decisions in complex situations and lead others with empathy and resilience.

PROFESSIONAL COMPETENCY

Digital and information literacy – A Glion graduate recognizes when information is needed, can effectively locate, evaluate and apply digital, numerical and text-based information to communicate, negotiate and generate new knowledge.

Leadership skills – A Glion graduate is able to adapt his/her own behavior to articulate his/her vision, motivate others using diverse communication channels and lead towards a shared goal by translating vision into action.

Integrity – A Glion graduate adheres to ethical principles including honesty, trustworthiness and accountability in all situations.

PERSONAL COMPETENCIES

Cultural literacy – A Glion graduate develops understanding of cultures and behaviors, allowing for work in international settings with people from all cultures effectively and respectfully.

Emotional intelligence – A Glion graduate is aware of his/her own emotions and those of others and has the ability to express emotions in a way that supports collaboration and effective teamwork.

Adaptability and resilience – A Glion graduate can effectively navigate change and manage a range of pressures to maintain a strategic outlook.

INTELLECTUAL COMPETENCIES

Growth mindset – A Glion graduate is an active, lifelong learner with curiosity for developing knowledge and skills.

Complex problem solving – A Glion graduate applies analytical, critical and creative thinking to find solutions to complex problems.

Decision making – A Glion graduate applies neutral judgment and systems thinking to analyze numerous variables and make informed decisions in a suitable time frame.

Learning categories

The GIHE intended student learning outcomes articulate the knowledge, skills and competencies all Glion students should possess upon graduation regardless of the specific program or specialization they may have completed. These statements will guide GIHE academic leaders, staff and faculty in creating program and course student learning outcomes and in developing rubrics for assessing individual student work. These statements are also grouped around the learning categories found in each program.

Programs of study

A Glion graduate exhibits a high level of professional competency, global readiness and transversal intellectual abilities. These are tracked throughout the programs at a course level and correspond with FHEQ learning levels. The BBA is based on learning levels 4 to 6 and the MSc is based at level 7. All courses within programs are grouped into the following categories:

- Practical arts
- Entrepreneurship
- Professional development
- General education

Within each category, students are taught and assessed based on knowledge and understanding, cognitive skills, professional competencies and transferable skills. Transferable skills are grouped around communication, numeracy, working with others, information literacy, using technology and learning how to learn. GIHE deems transferable skills in all courses to be part of the general education of a student as they support the development of an educated person and prepare students for the world in which they live.

PRACTICAL ARTS

Turning knowledge into competencies requires experience and that is found within practical arts. For undergraduate students, this entails hands-on courses on the Glion campus with a focus on technical and personal, social and emotional intelligence skills, guest experiences, trends, passions and innovations in operations. Practical, professional and general education skills are developed within a real-life simulated boutique hotel environment with restaurant outlets open to the general public. Students will work in various restaurants, including the Stéphane Décotterd fine-dining restaurant and Bistro, the Lounge Bar and the Club restaurant. Underpinning the practical experiences will be various workshops with the emphasis on hospitality excellence and luxury guest experience. Creativity, multi-cultural sensitivity, emotional and sensorial guest experience and the development of a luxury attitude is integrated through all experiences. Graduate students can also elect to take a practical experience through the Hospitality Immersion Program (HIP) prior to studies.

ENTREPRENEURSHIP

To be a business owner, general manager or CEO of a complex business, one must have core business skills and competencies along with operational knowledge. Students must also understand business markets and environments and have a corporate-level understanding of business operations, strategy and development in various domains, including for example finance, marketing and business development. An understanding of how innovation and the digital world impacts and changes business domains is also critical in the planning and continuation of sustainable business practices. GIHE also uses its industry partners to share expertise through many mechanisms inside and outside of the classroom. Many examples of this are evident in GIHE engagement with industry and academic-based competitions, conferences and entrepreneurial groups.

PROFESSIONAL DEVELOPMENT

Using the time-tested method of hospitality education, GIHE's programs build progressively to develop professional skills and knowledge for a wide range of managerial roles in experience-based industries. It includes the fundamentals of industry standards, professional immersion in internships, hospitality operations and management, business-domain courses and industry-related specializations. GIHE also emphasizes the development of hospitality, luxury and professional excellence in all courses. GIHE is also using its industry partners to share expertise through many mechanisms inside and outside of the classroom. Many examples of this are evident in visiting lecturers, company visits or field trips, consultancy-based applied business projects and live projects.

GENERAL EDUCATION

Glion's general education philosophy embodies the institution's definition of an educated person and prepares students for the world in which they will live and work. Students also demonstrate knowledge and understanding of scientific, historical and social phenomena as well as a knowledge and appreciation of the aesthetic and ethical dimensions of humankind. The institution also ensures all undergraduate students complete the equivalent of at least 40 semester credits in General Education in a Bachelor's degree program.

The general education requirement, contained within specific courses and within GIHE's global transferable skills, is both coherent and substantive. General education at Glion is firstly identified in specific courses. For example, the practical arts domain introduces the student to guest experiences and the importance of understanding and exceeding guest expectations. Arts de table, professional communication and behavior, service excellence, the passion for gastronomy and food, together with the spirit to serve and to provide excellence through emotional and sensorial guest experience is developed and explored. Students are required to develop skills in creativity, sensory analysis, empathy and the appreciation of aesthetics. The different facets of luxury service attitude, of being a host and fulfilling customer expectations and needs is expressed through emotional, professional and visual dimensions. The student should, at the end of semester 1, have an appreciation for the art of service linking to appreciation of the aesthetic, etiquette and ethical dimensions of humankind. Nutrition and wellness concepts are also introduced, along with visiting and in-house experts offering masterclasses in wines and their historical development, international-themed cuisine based on culture, the history of art de la table and protocols and mixology. Other courses within the program develop general education-based competencies in communication, foreign languages, ethics, research methodologies, statistics and technology. The luxury BBA includes elements of cultural studies covering the history of luxury, appreciation for cultural heritage and luxury attitudes and etiquette. Students also acquire an appreciation of ethics and social responsibility. Courses that explore topics such as corporate social responsibility, ethical decision-making and sustainable practices equip students with the knowledge to navigate these issues responsibly. As a continuation of Glion's general education philosophy, general education is shown in all programs and courses through Glion's global transferable skills assessment. This tests that students successfully demonstrate competence in written and oral communication in English, the ability for scientific and quantitative reasoning, for critical analysis and logical thinking and the capability for continuing learning, including the skills of information literacy.

Credit hours

Each three-credit provision is indicative of 135 hours of learning comprised of student contact, practical work (where applicable), private study and assessment. We use the model of 15 teaching hours to every one credit and up to 45 hours of teaching contact for a three-credit course. We also follow the standard of one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work within the Glion model.

Typically, in the BBA program, students will complete seven three credit courses in each semester and therefore be engaged in approximately 945 hours of learning. This equates to approximately 55 hours of learning per week across a 15+2-week semester. The scheduled class hours for each course will differ, but typically a student can expect to be in class for around 21 hours per week across 15 weeks. Students undertaking courses in semester 1 practical arts will require higher levels of contact time.

In Master's programs, students will complete the equivalent of five three-credit courses in each semester and therefore be engaged in approximately 675 hours of study. This equates to approximately 39 hours of learning per week across a 15+2-week semester. The scheduled class hours for each course will differ, but typically a student can expect to be in class for around 13 to 15 hours per week. Students undertaking optional courses in practical arts (hospitality immersion program, pre-sessional) will typically require higher levels of contact time.

Undergraduate programs

BBA in International Hospitality Business

CONCEPT OF THE BACHELOR PROGRAM

The overall aim of the BBA program in International Hospitality Business is to prepare students for careers in leading global hospitality companies with a specific focus on international hospitality business. Upon successful completion of the program, students will have acquired knowledge and understanding of the domain and further developed cognitive skills, professional competencies and transferable skills through a range of teaching and learning approaches. The teaching and learning then further develops these skills through exposure to contemporary theories and research and specialist electives within the context of hospitality business. Teaching methods range from traditional lectures through to practical task-based problem solving in context.

GRADUATE PROFILE

Glion undergraduates embark on international careers in leading hospitality and luxury companies. Multi-cultural, versatile and resourceful, they are global citizens skilled in the arts of hospitality. Their combination of practical experience, cutting-edge management competencies and a corporate approach enables them to apply their skills according to their specialization in luxury brand strategy, hotel development and finance or event management industries worldwide.

LEARNING OUTCOMES

Upon graduation from the BBA IHB program, students should be able to:

- Apply knowledge and skills acquired within a range of international hospitality environments to contribute successfully to the operation and running of a business
- Identify, analyze and solve a range of complex problems using both recognized and innovative tools and evidence
- Interact and communicate effectively and appropriately as a global citizen
- Accept responsibility for decisions and actions, demonstrating flexibility, adaptability and resilience when needed
- Work effectively with people from a range of cultures and support team initiatives and tasks
- Take responsibility for their own development and learning through self-reflection, analysis and planning

PROGRAM STRUCTURE

The BBA IHB program is a 3.5-year program of study divided into units called courses or modules that are assigned a specific number of credits. There are 120 credits in the program of study and all courses or modules must be passed. Of these, 44 credits are considered general education, either through specific courses or the transferable skills taught and assessed in courses or modules.

*Exchange semesters are at GIHE and Les Roches-based campuses. Exchange semesters with an approved Sommet Education sister school (i.e. Les Roches Marbella) are dealt with on a first come, first served basis. Only one exchange semester with a sister school can be completed. Requests for additional semesters, or for multiple semesters, will not be accepted. Numbers of students allowed to complete a semester exchange with a sister school are limited and are subject to acceptance as per selection criteria implemented for the period concerned.

- **Glion campuses may elect to institute a minimum course enrollment, such as canceling electives if less than a prescribed minimum number of students are enrolled.
- ***Exchange semesters are at GIHE-based campuses

Semester descriptors and course overviews

SEMESTER 1 – HOSPITALITY EXCELLENCE

SEMESTER DESCRIPTOR

Goal: To practice and assimilate hospitality service and operational skills and develop the art of hospitality excellence.

In this semester, the teaching and learning is designed to provide students with practical and transferable skills development within a real-life simulated boutique hotel environment. In addition, students will discover the world of hospitality through key trends, innovations and holistic understanding of hotel operations. The students will be immersed into food and beverage and rooms division operations as well as service culture and the art of hospitality. Upon successful completion of the semester, students should be able to demonstrate an understanding of the excellence required in hotel operational departments, apply practical and professional skills and transition into their internships.

COURSE OVERVIEWS

Front Office and Hotel Operations

Supported by experts from the world of hospitality, students will acquire skills and knowledge to respond to guest needs in different hotel operations departments. Students will discover the various steps that are part of the Guest Cycle (reservations, check-in, stayover, check-out) and the tasks commonly performed at the Front Desk. Housekeeping will be studied from both a theoretical and practical perspective, during which students learn the different tasks commonly carried out at an operational and supervisory level. Moreover, in the context of theater workshops and guided by experts, students will learn how to communicate appropriately with guests.

Bistro and Bars Concept

This course is designed to provide students with practical experience in working behind the bar and in a restaurant serving regional products. Throughout the course, students will work in both environments, serve customers, prepare drinks, and learn how to work effectively in a fast-paced hospitality environment. The course includes mixology classes, mise-en-place, and service workshops with experienced instructors. The practical components of the course involve students working in shifts in the restaurant and behind the bar, allowing them to gain hands-on experience in various roles and respect clients' requirements in dining (vegan, vegetarian etc).

Modern Pastry and Food & Beverage Knowledge

This course will introduce students to the world of Food and Beverage through exploring various cuisines. Students will examine key ingredients and develop a critical understanding of their creation through hands-on workshops, respecting the products and their use. The course is designed to provide a foundational knowledge of the production process and enable students to develop practical skills in the kitchen.

Contemporary Restaurant

This course is designed to provide students with practical experience in working in a fine dining kitchen and service environment, with a focus on precision in gastronomy and service excellence. Students will learn the importance of precision and attention to detail, service excellence, and menu knowledge. In the Gastronomic restaurant they will develop their knowledge and skills in presenting, promoting, and serving exclusive dishes, guided by professionals who will demonstrate the importance of service excellence.

Guest Relations

The course equips students with the skills and knowledge necessary to provide exceptional customer service in the hospitality industry. Students will explore the various professions, roles and responsibilities involved in guest relations. Students will have the opportunity to roleplay, gaining practical experience and building confidence in providing exceptional guest service.

Hospitality Universe and Spa Operations

This course is designed to provide students with a broad understanding of the spa industry. On this course students will learn about the different types of spa and different competitors in the spa industry. They will analyse different organizations related to hospitality and examine the link between guest segmentation and services. Students will explore the latest trends and developments within various sectors of the luxury market, as well as engage with industry experts.

Masterclass in Luxury Hospitality and Gastronomy

Students will acquire knowledge and skills related to luxury hospitality, gastronomy, and iconic products, as well as gain insights into guest experience and the importance of service excellence in the industry. The course will focus on the current operating landscape, relevance and responsiveness towards customers' experiences and expectations as well as trends. Regional products and suppliers are involved to highlight the importance of short supply chains.

Beverage around the World

This course is designed to provide students with an in-depth understanding of the beverage industry and production in a fast-paced environment. Students will explore the origins of various types of beverages, different types of bars and bartending techniques for mixing and serving drinks.

IT skills for the Hospitality Professional

This is a student-focused curriculum which recognises the differing abilities of students and which familiarises students with the use of key software applications. It will provide an understanding of office components, enabling the students to manage and use those features in an effective and professional manner. Through instructor-assisted, self-paced, step-by-step learning, demonstrations and practical applications, students will create documents, build worksheets, manipulate data, design presentations, and manage files and folders.

Wine Universe and Luxury Hospitality Trends

This course will introduce students to a luxury concept development, including the latest trends and those with a sustainable approach. Students will explore the latest F&B concepts, luxury branding strategies, and the development of high-end products and services. Students will discover the main characteristics of a wine, wine-making and biodiversity, as they meet and share with an expert from the field.

BUSINESS COMMUNICATION OR BUSINESS ENGLISH

Business Communication

Business Communication is an advanced, practical course that will enable students to develop professional presentation and business writing skills. They will learn how to select the most effective communication channel and ways to satisfy their target readers and listeners. They will work with industry-based scenarios and case studies to address issues faced by professionals in communicating with different stakeholders.

Business English

In Business English, students will learn how to use their language skills to communicate in real-life situations within the world of hospitality. They will discover how to identify the best communication channel to meet their needs and to write effective professional texts.

SEMESTER 2 – PROFESSIONAL IMMERSION

SEMESTER DESCRIPTOR

Goal: To develop professional and personal competencies while gaining real-world work experience.

In this semester, students are expected to apply previous knowledge to real hospitality work environments. The practical experience in the field allows students to demonstrate understanding of professional practices and to expand their perspective on what it means to be a professional in the hospitality industry. During the internship, students should develop an understanding of workplace diversity. Upon successful completion of the internship, students should be able to acquire and evaluate information in professional settings and to develop appropriate workplace behaviors.

COURSE OVERVIEWS

Internship

In the course, students should acquire the necessary knowledge and tools to search for and obtain a professional internship. The ensuing 24-week operational placement provides students with high-quality training designed to enhance professional competence and enrich personal development. Through a reflective report, students will identify how their own competencies and skills are aligned with industry expectations and how they need to develop in the areas of collaboration, communication and professionalism in preparation for their future career. At the end of the course, students should be able to apply the knowledge gained in both academic and industry environments to reflect upon their own personal and career development plans.

SEMESTER 3 – HOSPITALITY FUNDAMENTALS

SEMESTER DESCRIPTOR

Goal: To acquire established operational skills and competencies required in hospitality businesses.

In this semester, students will continue the transition from semester 1 through their first internship to the introduction of key concepts and managerial principles across a range of hospitality settings. The semester will build on the practical elements of operational management and at the same time allow students to develop a fundamental understanding of the characteristics of running a hospitality business. Upon successful completion of the semester, students should be able to apply knowledge and skills in decision making. Students also develop interpersonal competencies through academic learning and industry-focused study, preparing them for professional environments.

COURSE OVERVIEWS

Hospitality Marketing Essentials

This course explores the role and key theories and practices of marketing in business today. The importance of marketing will be appraised within the framework of both product manufacturers and service industries. Students will explore key concepts and functions of marketing. They will also be asked to apply these to a range of business contexts based on industry scenarios.

Hospitality Financial Accounting

The course is designed to provide students with an understanding of concepts and uses of financial accounting information in a business environment. It demonstrates how effective accounting systems capture daily business transactions to support managers' decision-making processes. It introduces the students to the theory of debits and credits, the accounting cycle, receivables and payables, accruals and deferrals, measurement and valuation of assets and liabilities, income statement and balance sheet. It will also examine the determination of net income (profit), statement of owners' equity, statement of cash flow and the preparation and interpretation of basic financial statements, under the context of Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards (IFRS).

Professional Communication and Academic Writing

This course is designed to provide students with the communication and research skills needed in both professional and academic contexts. Students will use various research tools, refine their skills in searching databases efficiently and critically analyze and present information through a variety of appropriate means. Communications in a professional and academic environment will be explored, developed and applied to a written project and oral presentation.

People and Performance in the Workplace

The hospitality industry relies on the performance of people to deliver a variety of services to their guests. Successful managers must therefore know and understand what influences their employees' behavior to maximize performance and help the business develop its competitive advantage through its people. This course enables students to explore a variety of factors that underpin staff behavior and their performance in the organization, such as personality, values, motives, teams and organizational culture and structure. The Organizational Behavior framework will be used to examine the performance of the individual, the group and the wider organization. The impact of contemporary issues such as employee well-being and flexible work practices will also be explored.

Hospitality and Events Operations

Students will assess operational process management models and how they fit alongside the interrelated nature of running a business or an event. The flow of hospitality and event operations and resources will be studied and evaluated to optimize operational efficiency and maximize customer experience. The students will also recognize the interrelated nature of internal and external players for successful operations and review the risks and challenges operations may face.

IT Business Tools

This course provides students with the knowledge of relevant software to plan and facilitate business operations with application to the hospitality industries. Spreadsheets, business planning tools and other software to support business decision-making and forecasting will be reviewed. Students will also recognize the importance of application (apps) tools and the impact on everyday work practice and management. They will also learn how to design a functional app relevant to the current cutting-edge needs of the hospitality and tourism industry.

AND ONE GENERAL EDUCATION ELECTIVE:

French Beginners

This course aims to introduce students to French language and culture. The focus will be on listening, reading, speaking and writing. Vocabulary and activities will be based around a business and hospitality context to enable students to communicate effectively at a beginner's level. The course corresponds to the Common European Framework of Reference (CEFR) level A1.

French Elementary

This course aims to further develop a student's abilities to communicate in French. The focus will be on listening, reading, speaking and writing. Vocabulary and activities will be based around a business and hospitality context to enable students to communicate effectively at an elementary level. The course corresponds to the Common European Framework of Reference (CEFR) level A1.

French Intermediate

This course aims to further develop a student's abilities to communicate in French. The focus will be on listening, reading, speaking and writing. Learning activities focus on business and hospitality contexts to enable students to communicate effectively at an intermediate level. The course corresponds to the Common European Framework of Reference (CEFR) level A2.

Spanish Beginners

This course aims to introduce students to Spanish language and culture. The focus will be on listening, reading, speaking and writing. Vocabulary and activities will be based around a business and hospitality context to enable students to communicate effectively at a beginner's level. The course corresponds to the Common European Framework of Reference (CEFR) level A1.

Spanish Elementary

This course aims to further develop a student's abilities to communicate in Spanish. The focus will be on listening, reading, speaking and writing. Vocabulary and activities will be based around a business and hospitality context to enable students to communicate effectively at an elementary level. The course corresponds to the Common European Framework of Reference (CEFR) level A1.

Spanish Intermediate

This course aims to further develop a student's abilities to communicate in Spanish. The focus will be on listening, reading, speaking and writing. Learning activities focus on business and hospitality contexts to enable students to communicate effectively at an intermediate level. The course corresponds to the Common European Framework of Reference (CEFR) level A2.

Food and Society

The purpose of this course is to provide students with a broad insight into various aspects of food as an essential component of everyone's life. The course will first explore food from a technological and scientific perspective. It also aims to dispel the common misinterpretation of 'chemical' as a synonym of 'harmful' food ingredients and underpin the students' knowledge on the chemical nature of all food components and nutrients. Contemporary examples of food processing methods will be presented and discussed in the context of quality and taste. Afterwards, students will be introduced to the history, cultural and sociological background of food. Finally, students' learning will be underpinned by analyses of the importance of risk assessment, quality control systems and food safety in a professional setting and in everyday life.

Intercultural Communication, Collaboration and Negotiations

This course aims to prepare students for the world of work where interpersonal skills are key. It will cover three main aspects of communication and collaboration: interpersonal communication, intercultural communication and widely understood teamwork, with aspects of collaboration and conflict resolution. It is designed to build student skills in a gradual way by first focusing on communication techniques between individuals and groups. It then deepens their knowledge of communication by looking at particular cultural differences that might impact how communication is dealt with and received around the globe. Finally, the course develops student's ability to work with others by looking at practical tools and solutions to be implemented when working with peers in business settings.

International Relations

This course is designed to immerse students in dynamic global international relations and political systems in an era of shifting borders, restructuring economies and regional realignments. It covers the interactions of stakeholders at an international level, including states and supra-national groups such as the United Nations, Amnesty International and European Institutions. More precisely, the course introduces concepts of global governance, diplomacy, foreign policy, political economy and international security and examines the evolution of international relations in the 20th and 21st centuries.

SEMESTER 4 – HOSPITALITY MANAGEMENT

SEMESTER DESCRIPTOR

Goal: To develop managerial skills and the understanding of organizational processes and challenges within the dynamic world of hospitality.

In this semester, students will be immersed into management domains with a focus on exploring innovative solutions to challenges faced by hospitality professionals in a constantly changing environment. The courses include both macro and micro perspectives and should result in the students developing their abilities to analyze and reflect on concepts and factual data essential to problem solving in the hospitality industry. Upon successful completion of the semester, the students should be able to generate principled and effective managerial decisions and reflect upon self-development opportunities.

COURSE OVERVIEWS

Integrated Marketing Communications in the Digital Era

This course focuses on the role of integrated marketing communications in sales of products and services in the digital era. It explores the opportunities and challenges created by global changes in consumer behavior related to technological and cultural shifts of the modern age. Students will be given an opportunity to analyze the needs of specific target audiences and design a targeted communications strategy using carefully selected tools and channels.

Managerial Accounting

Managerial accounting will develop a student's ability to use financial and operational information to make informed decisions for the future. The student will analyze hospitality firms' financial statements and departmental costs and apply cost/volume/profit analysis. The student will also create operations and cash budgets.

Management of Rooms

This course aims to further develop the student's understanding of managerial and strategic practices within the Rooms Division. Key concepts of revenue management, customer satisfaction, value creation and quality management are explored. The course develops a student's competencies in market and competitive analysis, decision making and problem solving.

Economics for Hospitality and the Tourism Industry

Students on this course will examine general economic concepts and basic definitions in relation to hospitality and the characteristics of tourism supply and demand (transportation, destination and distribution). They will evaluate tourism trends, destination competitiveness, impacts and mergers and acquisitions through the use of different economic theories and models. Students will assess the role and strategies of public organizations and private businesses in the management of the tourism system and analyze the consequences of tourism in relation to the theory of sustainable development.

Data Analysis for Decision Makers

The purpose of this course is to equip students with the analytical and statistical competencies required to transform data into useful information. Contemporary examples are taken from the hospitality industry to underpin students' knowledge and application of appropriate techniques for data collection, presentation and analysis. Students are exposed to a variety of techniques covering analytical and statistical tools to support their informed decision in real-life business situations. Statistical software is used to assist in data analysis and presentation of the results to an audience.

Concept Development and Entrepreneurship in Food and Beverage Management

This course is designed to develop a set of key skills for designing and running a Food and Beverage (F&B) operation. Learning activities include applying a creative approach to the design of a food and beverage outlet, encompassing the research of future trends and applying innovation to the proposal of an F&B concept. This will also include a focus on sustainability and CSR. In addition, the course develops management and transferable skills such as managing costs, improving profitability, enhancing customer experience, communication, numeracy and working with others, all of which are essential elements in the toolkit of the modern manager.

AND ONE GENERAL EDUCATION ELECTIVE:

French Beginners

The aim of this course is to introduce students to French language and culture. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business and hospitality context to enable students to communicate effectively at a beginner's level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

French Elementary

The aim of this course is to further develop a student's abilities to communicate in French. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business and hospitality context to enable students to communicate effectively at an elementary level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

French Intermediate

The aim of this course is to further develop a student's abilities to communicate in French. The focus will be on listening, reading, speaking, and writing. Learning activities focus on business and hospitality contexts to enable students to communicate effectively at an intermediate level. The course corresponds to the Common European Framework of Reference (CEFR), level A2.

Spanish Beginners

The aim of this course is to introduce students to Spanish language and culture. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business and hospitality context to enable students to communicate effectively at a beginner's level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

Spanish Elementary

The aim of this course is to further develop a student's abilities to communicate in Spanish. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business and hospitality context to enable students to communicate effectively at an elementary level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

Spanish Intermediate

The aim of this course is to further develop a student's abilities to communicate in Spanish and culture. The focus will be on listening, reading, speaking, and writing. Learning activities focus on business and hospitality contexts to enable students to communicate effectively at an intermediate level. The course corresponds to the Common European Framework of Reference (CEFR), level A2.

Food and Society

The purpose of this course is to provide students with a broad insight of various aspects of food as an essential component of everyone's life. The course will first explore food from a technological and scientific perspective. It also aims to dispel common fear of "chemical" as a synonym of "harmful" food ingredients and underpin the students' knowledge on the chemical nature of all the food components and nutrients. Contemporary examples of food processing methods will be presented and discussed in the context of quality and taste. Afterwards, students will be introduced to the history, cultural and sociological background of food. Finally, students learning will be underpinned by analyses of the importance of risk assessment, quality control systems and food safety in a professional setting and in everyday life.

Intercultural Communication, Collaboration and Negotiations

The aim of this course is to prepare students for the world of work where interpersonal skills are key. This course will cover three main aspects of communication and collaboration: interpersonal communication, intercultural communication and widely understood teamwork, with aspects of collaboration and conflict resolution. It is designed to build student skills in a gradual way by first focusing on communication techniques between individuals and groups. It then deepens the knowledge of communication by looking at particular cultural differences which might impact how communication is dealt with and received around the globe. Finally, the course develops student's ability to work with others by looking at practical tools and solutions to be implemented when working with peers in business settings.

International Relations

The course is designed to immerse students in dynamic global international relations and political systems in an era of shifting borders, restructuring economies and regional realignments. The course covers the interactions of stakeholders at an international level, including states and non-states, such as the United Nations, Amnesty International and European Institutions. More precisely, the course introduces concepts of global governance, diplomacy, foreign policy, political economy, and international security, and examines the evolution of international relations in the 20th and 21st centuries.

SEMESTER 5 – MANAGEMENT PRACTICE

SEMESTER DESCRIPTOR

Goal: To reflect on managerial competencies in the workplace.

In this semester, students return to industry and reflect on managerial competencies and challenges experienced in the world of work. At the same time, students should shape their understanding of real-life managerial approaches, philosophies and practices. The second internship should develop students' career and personal development aspirations. Upon successful completion of the internship, students should be able to effectively apply problem-solving techniques and critical-thinking skills and demonstrate their development as an individual contributor and a valuable team member.

COURSE OVERVIEWS

Internship

In the course, students should acquire the necessary knowledge and tools to search for and obtain a professional internship. The ensuing 24-week placement should provide students with high-quality training designed to enhance professional competence and enrich personal development. This internship will ideally take place in a different work environment from the first and students should be able to review and explore the experiences of supervisors or managers in a workplace. The internship experience should focus on future career preparation and the development of competencies that can be further developed after graduation.

Reflection on Management Practice

This course aims to link academic knowledge with industry experience gained in the semester five student internship. Core theoretical principles and perspectives associated with the world of hospitality will be reviewed, notably customer satisfaction management and the roles of training and development and leadership. Students will also reflect on their experiences and be able to recognize development needs within their own professional competencies and transferable skills. They should also develop problem-solving and research competencies, which will be key to their final year of studies.

SEMESTER 6 – INTEGRATED BUSINESS STRATEGIES

SEMESTER DESCRIPTOR

Goal: To integrate the skills, knowledge and experience gained to manage potential uncertainty at a strategic level.

In this semester, students are immersed in developing competencies so they can implement successful business strategies. Students are expected to develop a strategic mindset and apply business theory to complex and ambiguous scenarios and be able to recommend strategic alternatives at a corporate and business unit level. Upon successful completion of the semester, students should have developed their core business acumen in preparation for their final semester specialization and capstone project.

COURSE OVERVIEWS

Business Development and Strategy

Students will be introduced to core concepts and theories relating to business development and business strategy and how they may be applied across a wide spectrum of business cases. The course enables students to use their analytical skills drawn from previous research and data analysis courses to identify and analyze current market trends. Students will also explore the influence of these trends on the strategic direction of major companies. Through the execution of case studies, students will acquire the necessary competencies to appraise strategic decisions taken at corporate and business unit level in relation to the potential future success of organizations.

Corporate Finance

This course is designed to provide a theoretical and empirical overview of the major concepts and analytical tools of corporate finance. Students should be able to analyze the financial risks of a project and determine its required level of profitability to assess its financial feasibility. Topics covered include profitability measures, sources of financing, capital budgeting and the cost of capital.

Leadership Skills for Change Management

This course introduces a wide variety of contemporary theoretical approaches that will enable students to discover and develop their leadership skills within their organizational and business environments. As future managers, students will be able to put in place relevant strategies to navigate through change, crisis and risk management. Knowing how to use these strategies will allow students to understand how their leadership style can impact organizational function. This course allows students to select the most appropriate management tools to ensure a positive outcome depending on the business situation.

Revenue Management and Distribution Channel Management

On this course, students will apply and critically review contemporary revenue management principles and practices to formulate strategies for profit and distribution channels optimization. By emphasizing the importance of the degree of operating leverage (DOL) and cost structure for pricing, forecasting and distributing the hotel inventory, students will develop analytical skills for strategic decision making.

Human Resources Talent Management

Attracting, engaging and retaining the right talent is a fundamental and strategic organizational activity of increasing complexity and importance. This course aims to provide students with both a theoretical and practical understanding of talent management practices, allowing students to recognize the crucial role that Human Resources and line management play in acquiring, deploying and developing talent to address business needs and improve organizational performance.

Business Ethics and Corporate Social Responsibility

This course explores how business ethics and their relationship with business decisions and corporate social responsibility impact the modern business world. The international business arena provides a vast array of intriguing ethical challenges for today's manager. Through the exploration of many of these challenges or cases, the course aims to provide students with the tools and skills needed to identify and critically evaluate ethical issues encountered in individual, organizational and societal contexts.

Business and Academic Research Methods

Students will develop their critical application of the research process and explore a research topic in either or both a quantitative and/or qualitative domain. Students will also select and use appropriate research methodologies that align with a research question or hypothesis. By the end of the course, students will be able to identify and analyze a real-life business problem through appropriate literature and data.

SEMESTER 7 – SPECIALIZATION AND BUSINESS PROJECT

SEMESTER DESCRIPTOR

Goal: To develop skills, knowledge and experiential learning within a chosen specialization and capstone project that generates innovative solutions from contradictory information.

In this semester, students are focusing on areas of specialization within the world of hospitality. They are required to demonstrate creativity and innovation in conceptualization, contemporary approaches in problem solving and conflict resolution and show openness to new or novel ideas within a specialism.

Upon successful completion, students should have developed key cognitive skills and be able to demonstrate confidence and flexibility in managing complex problems. Students should also be able to reflect on specialist knowledge and argue from competing perspectives.

COURSE OVERVIEWS

ONE OF THE FOLLOWING CAPSTONE ELECTIVES:

Bachelor Thesis

The thesis is a culminating academic work that forms the capstone of research for a Bachelor's degree. The course is aimed at accomplishing academic research independently and involves students writing a 10,000-word study on a chosen topic in either the luxury brand strategy, international hotel development and finance or international event management specializations. One-to-one tutoring is held regularly, but the overall emphasis of the course is placed on self-regulated learning and research activities. Students are required to present critical review on existing literature on chosen topic areas, develop a conceptual framework, conduct appropriate primary research with relevant methods, analyze collected data to build arguments and develop discussion. Major findings need to be recapitulated and students draw conclusions through evaluation and syntheses.

Applied Business Project

The applied business project is a business research-based capstone that consolidates student's knowledge and skills acquired throughout their studies. Students will work as consultants and solve a real-life business problem for an industry partner. Ideally topics will be within one of the following specializations: luxury brand strategy, international hotel development and finance or international event management. Based on the mission given by the client, students will be responsible for setting objectives, reviewing relevant industry and academic-based literature, selecting appropriate research methodologies, collecting and analyzing data and providing the client with sound recommendations.

AND ONE OF THE FOLLOWING SPECIALIZATION ELECTIVES:

Specialization in Luxury Brand Strategy

The course provides students with a deep and systematic understanding of luxury as a concept, the luxury business and the relationship between the luxury goods and the hospitality industries today. Students will explore the concept of luxury, the role it plays in society and the changes and current trends in the luxury goods and services sector. They will analyze key dimensions and characteristics of luxury from a multi-disciplinary perspective, the creation and management of the luxury brand and brand identity. They will also look at the role of marketing and evaluate the marketing mix model for luxury, including opportunities brought about by digital innovations. They will learn how to build loyalty by delivering service excellence. Finally, students will conceptualize a multi-sensorial and emotionally engaging guest experience as part of an experiential luxury strategy.

Specialization in International Hotel Development and Finance

A crucial role for today's senior hotel professionals is to enhance value for a hotel owner by understanding the business from an owner's perspective. This course will introduce students to the industry's main stakeholders, its business models and the brand expansion strategies open to investors. It will also focus on essential tools to analyze hotel revenue and profit trends using key performance indicators (KPI's). Students will also have the opportunity to develop a hotel feasibility study based on a new hotel concept and space plan and negotiate best-in-class management agreements. This course will focus students on the best practice valuation methodologies and their application to hotel assets and investment project KPI's to maximize performance and create value. Students will apply their learning to determine the key product combination, trends and financial drivers that make a successful resort project. They will also experience the latest product and service trends in one of Europe's dynamic hotel markets.

Specialization in International Event Management

This course looks in depth at the international events industry, specific industry sectors and key players. It will also review the roles of events in society, their impact on the economy and the importance of events. It explores trends, new business models, innovation and concepts including MICE and customer types and the advent of new technologies. It then examines the development and planning of a strategically feasible live event. The course brings together all elements of event management and students put theory into practice by hosting an event on campus. Finally, students reflect on this experience and present a post-event evaluation.

BBA in Luxury Business

CONCEPT OF THE BACHELOR PROGRAM

The overall aim of the BBA program in Luxury Business is to prepare students for careers in leading global luxury companies with a specific focus on international luxury business. Upon successful completion of the program, students will have acquired knowledge and understanding of the domain and further developed cognitive skills, professional competencies and transferable skills through a range of teaching and learning approaches. Students further develop these skills through exposure to contemporary theories and research and specialist electives in the context of hospitality business. Teaching methods range from traditional lectures through to practical task-based problem solving in context.

GRADUATE PROFILE

Glion undergraduates embark on international careers within the realm of leading luxury companies. As global citizens, they are renowned for their multicultural adaptability and resourcefulness, making them exceptionally skilled in the arts of luxury. With a perfect blend of practical experience, cutting-edge management competencies and a corporate mindset, they are well-equipped to excel in specialized fields such as luxury brand strategy, company development and finance and experience design management across the globe.

LEARNING OUTCOMES

Upon graduation from the BBA Luxury Business program, students should be able to:

- Apply knowledge and skills acquired within a range of international luxury environments to contribute successfully to the operation and management of a luxury business
- Identify, analyze and solve a range of complex problems using both recognized and innovative tools and evidence
- Interact and communicate effectively and appropriately as a global citizen
- Accept responsibility for decisions and actions, demonstrating flexibility, adaptability and resilience when needed
- Work effectively with people from a range of cultures and support team initiatives and tasks
- Take responsibility for their own development and learning through self-reflection, analysis and planning

PROGRAM STRUCTURE

The BBA in Luxury Business program is a 3.5-year program of study divided into units called courses or modules that are assigned a specific number of credits. There are 120 credits in the program of study and all courses or modules must be passed. Some 44 credits are considered general education, either through specific courses or the transferable skills taught and assessed in courses or modules.

SEMESTER 1 – LUXURY FUNDAMENTALS

Required courses – Practical Arts and General Education	Credits	General Education credits
Introduction to the Luxury Industry	1	1
New Luxury in Tourism	1	1
Luxury Attitude and Etiquette	1	1

of which general education credits (40 credits minimum required)		40

**Glion campuses may elect to institute a minimum course enrollment, such as canceling electives if less than a prescribed minimum number of students are enrolled.

Semester descriptors and course overviews

SEMESTER 1 – LUXURY FUNDAMENTALS

SEMESTER DESCRIPTOR

Goal: To provide students with a comprehensive understanding of the luxury service industry, develop practical skills in hospitality operations and foster a strategic mindset for business success.

In this semester, students will delve into the realm of luxury hospitality and business. Through a combination of theoretical knowledge and practical applications, they will gain a comprehensive understanding of the luxury industry. The curriculum explores the luxury mindset, etiquette and branding, while providing students with practical and transferable skills development within a real-life simulated luxury hospitality environment. Further, students will cover business fundamentals necessary to succeed in the luxury business industry, ensuring they gain a holistic understanding, with practical exposure and real-world examples, of luxury hospitality and business operations.

Upon successful completion of the semester, students will have acquired a solid foundation in luxury hospitality and business and be able to apply practical and professional skills that prepare them for their transition into their internships.

COURSE OVERVIEWS

Introduction to the Luxury Industry

This course introduces students to the world of luxury, exploring the key players and their roles in industry. The course will provide an overview of the luxury industry and the outlook for its future. Students will gain an understanding of the different players, learn about the challenges and opportunities facing the industry, consumer preferences, emerging markets and new technologies.

New Luxury in Tourism

This course aims to introduce students to the concept of luxury in the tourism industry and explore how it is evolving in response to changing consumer preferences and market dynamics. It will provide students with an understanding of the various facets of luxury tourism, its significance to the tourism industry and the challenges and opportunities faced by luxury tourism providers in today's dynamic marketplace.

Luxury Attitude and Etiquette

This course teaches students how to succeed in the global luxury market by covering topics such as luxury attitude and etiquette, cultural nuances and social skills. Students will learn about non-verbal communication, dining etiquette, dress codes and social manners. The course also emphasizes the importance of customer service and how to provide a world-class service experience.

Gastronomic Restaurants

During this course, students will discover the world of fine dining and service excellence in a gastronomic environment. This course is designed to provide students with practical experience in working in a fine dining kitchen and service environment, with a focus on precision in gastronomy and service excellence. Students will learn the importance of precision and attention to detail, service excellence, and menu knowledge. In the Gastronomic restaurant they will develop their knowledge and skills in presenting, promoting, and serving exclusive dishes guided by professionals who will demonstrate the importance of service excellence.

Bistro and Bars

This course is designed to provide students with practical experience in working behind the bar and in a restaurant serving regional products. Throughout the course, students will have the opportunity to work in both environments, serving customers, preparing drinks and learning how to work effectively in a fast-paced hospitality environment. The course includes mixology classes, mise-en-place and service workshops with experienced instructors. The practical components of the course involve students working in shifts in the restaurant and behind the bar, allowing them to gain hands-on experience in various roles and respect clients' dietary requirements (vegan, vegetarian, etc.).

Guest Relations

This course equips students with the skills and knowledge they need to provide exceptional customer service in the hospitality industry. Students will explore the various professions, roles and responsibilities involved in guest relations. They will also have the opportunity to role play, gaining practical experience and building the confidence to provide exceptional guest service.

Exclusive Spa and Wellness

This course is designed to provide students with a broad understanding of the spa industry. On this course, students will explore various types of spas and wellness centers and gain insights into the best practices that ensure a successful spa operation. Throughout this course, students will learn about the importance of delivering exceptional customer experiences and the role of sustainability in spa operations.

Luxury Universe

This course is designed to provide students with a broad understanding of luxury businesses. On this course, students will analyze different organizations related to luxury and examine the link between guest segmentation and services. They will explore the latest trends and developments within various sectors of the luxury market and will engage with industry experts.

Front Office Operations

The course provides students with a comprehensive introduction to Property Management System (PMS) and its applications in both retail and hospitality industries. Students will gain a foundational understanding of PMS, with a focus on OPERA as an example system. The course aims to equip students with the necessary knowledge and skills to navigate the PMS, create and manage reservations, check in and check out guests, manage room inventory, process payments, generate reports, and effectively utilize the system to manage guest profiles and preferences. Additionally, they'll gain essential Microsoft Office skills, particularly Excel for data analysis and visualization, enhancing their ability to make informed decisions.

Luxury Branding and Trends

This course will focus on the latest concepts, development and analyzing luxury branding strategies, the latest trends on the market and development of high-end products and services with a sustainable approach. It places a strong emphasis on understanding the impact of these trends on luxury markets and industry.

Luxury Wines and Champagnes

In this course, students will enter the world of exquisite wines and champagnes. They will discover how these fine beverages are made, explore different varieties and understand their main characteristics. Learning from industry experts, students will gain valuable insights into the role of a sommelier, the importance of sustainable practices and the role of biodiversity in production. Moreover, the course encourages students to develop their skills in appreciating and analyzing fine wines and champagnes.

Masterclass and Luxury Hospitality and Gastronomy

Students will acquire knowledge and skills related to luxury hospitality, gastronomy and iconic products as well as gaining insights into guest experience and the importance of service excellence in the industry. The course will focus on the current operating landscape, relevance and responsiveness towards customers' experiences and expectations and trends. Regional products and suppliers are involved to highlight the importance of short supply chains and usage.

Principles of Marketing

This course offers a comprehensive overview of marketing, focusing on both product manufacturers and service industries as well as luxury business. The course covers the fundamental elements of marketing and explores the importance of marketing in creating and sustaining customer value, building brand equity and achieving business objectives in the luxury industry. Students will be introduced to key theories, concepts and practices of marketing and will apply them to various industry scenarios.

Accounting Essentials

This course will teach students how to use financial accounting information in a business setting. Students will learn how accounting systems record daily transactions to help managers make decisions. They will also learn about concepts such as debits and credits, the accounting cycle, receivables and payables and how to measure and value assets and liabilities. The course will cover income statements and balance sheets as well as other financial statements. The course will also explore how to prepare and interpret financial statements using Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards (IFRS).

Designing Luxury Products and Services

This course is designed to provide students with comprehensive knowledge and skills related to the luxury retail industry, including customer service and the principles of luxury product and service design. By exploring the current operating landscape, trends and the importance of responding to customers' experiences and expectations, students will gain insights into the relevance of providing a world-class service experience within the luxury industry.

Business English

In Business English, students will learn how to use their language skills to communicate in real-life situations within the world of hospitality. They will discover how to identify the best communication channel to meet their needs and how to write effective professional texts.

SEMESTER 2 – PROFESSIONAL IMMERSION

SEMESTER DESCRIPTOR

Goal: To develop professional and personal competencies while gaining real-world work experience.

In this semester, students are expected to apply previous knowledge to real work environments. The practical experience in the field allows students to demonstrate understanding of professional practices and to expand their perspective on what it means to be a professional in the luxury industry. During the internship, students should develop an understanding of workplace diversity.

Upon successful completion of the internship, students should be able to acquire and evaluate information in professional settings and to develop appropriate workplace behaviors.

COURSE OVERVIEWS

Internship

In the course, students should acquire the necessary knowledge and tools to search for and obtain a professional internship. The ensuing 24-week operational placement provides students with high-quality training designed to enhance professional competence and enrich personal development. Through a reflective report, students will identify how their own competencies and skills are aligned with industry expectations and how they need to develop in the areas of collaboration, communication and professionalism in preparation for their future career. At the end of the course, students should be able to apply the knowledge gained in both academic and industry environments to reflect upon their own personal and career development plans.

SEMESTER 3 – LUXURY MANAGEMENT I

SEMESTER DESCRIPTOR

Goal: To acquire established operational skills and competencies required in luxury businesses.

In this semester, students will continue the transition from semester one through their first internship to the introduction of key concepts and managerial principles across the multifaceted world of luxury. The semester will build on the practical elements of operational management and at the same time develop a fundamental understanding of the characteristics of running a business in luxury.

Upon successful completion of the semester, students should be able to apply knowledge and skills in decision making. Students also develop interpersonal competencies through academic learning and industry-focused study, preparing them for professional environments.

COURSE OVERVIEWS

Luxury Marketing Essentials

Luxury Marketing Essentials is a comprehensive course designed to provide students with a deep understanding of the fundamentals of marketing in the luxury industry. This course explores the unique characteristics and challenges associated with marketing high-end products and services, equipping students with the knowledge and skills necessary to excel in this competitive sector.

Financial Statement Analysis

This comprehensive course is designed to provide students with the knowledge and skills required to effectively analyze and interpret financial statements of companies. Through a combination of theoretical concepts, practical examples and case studies, this course aims to equip students with the essential tools to evaluate the financial health and performance of organizations.

Luxury Fashion Design

This course provides students with a comprehensive understanding of the creative and business aspects of luxury fashion. It aims to develop their skills and knowledge in designing and creating high-end fashion products while equipping them with the essential business acumen required in the luxury industry.

Talent and HR Management

Values and motivation factors can differ substantially from individual to individual and the luxury industry relies heavily on the performance of people to deliver competitive services. Successful managers must therefore acquire knowledge about the inner mechanisms that drive their staff's behavior to bring the best out of their teams. This course enables students to explore how staff engagement, loyalty, buy-in and autonomy may be influenced. Theoretical and practical influence values students learn about include: motivators, communication style and learning styles, all of which relate to a greater understanding of overall team performance.

Ultra-Luxury Products and Experiences

The course offers a comprehensive exploration of the fascinating world of high-end products and experiences. Designed to provide students with a deep understanding of the dynamics and intricacies of the ultra-luxury market, this course combines theoretical knowledge with practical insights from industry experts.

IT Business Tools

This course provides students with the knowledge of relevant software to plan and facilitate business operations with application to the luxury industry. Spreadsheets, business planning tools and other software will be reviewed to support business decision-making and forecasting. Students will also recognize the importance of application (apps) tools and the impact on everyday work practice and management. Additionally, they will learn how to design a functional app relevant to the current cutting-edge needs of the luxury industry.

Economics and Sociology of Luxury

A comprehensive exploration of the intersection between economics and sociology in the context of luxury. By examining the multifaceted nature of luxury from both theoretical and practical perspectives, this course aims to provide students with a deep understanding of the economic principles and social dynamics that underpin the luxury industry.

AND ONE GENERAL EDUCATION ELECTIVE:

French Beginners

The aim of this course is to introduce students to French language and culture. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business context to enable students to communicate effectively at a beginner's level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

French Elementary

The aim of this course is to further develop a student's abilities to communicate in French. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business context to enable students to communicate effectively at an elementary level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

French Intermediate

The aim of this course is to further develop a student's abilities to communicate in French. The focus will be on listening, reading, speaking, and writing. Learning activities focus on business contexts to enable students to communicate effectively at an intermediate level. The course corresponds to the Common European Framework of Reference (CEFR), level A2.

Spanish Beginners

The aim of this course is to introduce students to Spanish language and culture. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business context to enable students to communicate effectively at a beginner's level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

Spanish Elementary

The aim of this course is to further develop a student's abilities to communicate in Spanish. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business context to enable students to communicate effectively at an elementary level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

Spanish Intermediate

The aim of this course is to further develop a student's abilities to communicate in Spanish and culture. The focus will be on listening, reading, speaking, and writing. Learning activities focus on business contexts to enable students to communicate effectively at an intermediate level. The course corresponds to the Common European Framework of Reference (CEFR), level A2.

Intercultural Communication, Collaboration and Negotiations

The aim of this course is to prepare students for the world of work where interpersonal skills are key. This course will cover three main aspects of communication and collaboration: interpersonal communication, intercultural communication and widely understood teamwork, with aspects of collaboration and conflict resolution. It is designed to build student skills in a gradual way by first focusing on communication techniques between individuals and groups. It then deepens the knowledge of communication by looking at particular cultural differences which might impact how communication is dealt with and received around the globe. Finally, the course develops student's ability to work with others by looking at practical tools and solutions to be implemented when working with peers in business settings.

International Relations

The course is designed to immerse students in dynamic global international relations and political systems in an era of shifting borders, restructuring economies and regional realignments. The course covers the interactions of stakeholders at an international level, including states and non-states, such as the United Nations, Amnesty International and European Institutions. More precisely, the course introduces concepts of global governance, diplomacy, foreign policy, political economy, and international security, and examines the evolution of international relations in the 20th and 21st centuries.

SEMESTER 4 – LUXURY MANAGEMENT II

SEMESTER DESCRIPTOR

Goal: To develop managerial skills and the understanding of organizational processes and challenges within the dynamic world of luxury.

In this semester, students will be immersed into management domains with a focus on exploring innovative solutions to challenges faced by luxury industries in a constantly changing environment. The courses include both macro and micro perspectives and should result in the students developing their abilities to analyze and reflect on concepts and factual data essential to problem solving in the luxury sector.

Upon successful completion of the semester, the students should be able to generate principled and effective managerial decisions and reflect upon self-development opportunities.

COURSE OVERVIEWS

Integrated Digital Marketing

This course will provide the students with a sound theoretical basis in selling and digital marketing. Students should acquire the skills needed in the sales process and key account management and they should be able to develop customer-related selling practices. The digital environment affecting the sales process will also be appraised, while relevant digital marketing strategies will be analyzed and applied in the hospitality context.

Corporate Finance

This course is designed to provide a theoretical and empirical overview of the major concepts and analytical tools of corporate finance. Students should be able to analyze the financial risks of a project and determine its required level of profitability to assess its financial feasibility. Topics covered include profitability measures, sources of financing, capital budgeting and the cost of capital.

Legal Environment of Luxury Industries

The course provides students with a comprehensive understanding of the legal aspects that govern the luxury industry. As the luxury sector continues to expand globally, it faces unique legal challenges and regulations that require specialized knowledge. This course explores the intersection of law and luxury, equipping students with the necessary tools to navigate the legal landscape in this exclusive industry.

Business Trends in Luxury Products and Services

The course provides a comprehensive overview of the evolving landscape of the luxury industry. It aims to equip students with a deep understanding of the latest trends, challenges and opportunities in the business of luxury products and services. Through a combination of theoretical concepts, case studies and practical insights, students will develop the necessary skills to navigate and excel in this dynamic and highly competitive sector.

Data Analysis for Decision Makers

The purpose of this course is to equip students with the analytical and statistical competencies required to transform data into useful information. Contemporary examples are taken from the luxury industry to underpin the students' knowledge and application of appropriate techniques for data collection, presentation and analysis. Students are exposed to a variety of techniques, covering analytical and statistical tools, to support informed decisions in real-life business situations. Statistical software is used to assist in data analysis and the presentation of the results to an audience.

Business and Academic Research Methods

Students will develop their critical application of the research process and explore a research topic in either or both a quantitative or qualitative domain. They will also select and use appropriate research methodologies that align with a research question or hypothesis. By the end of the course, students will be able to identify and analyze a real-life business problem through appropriate literature and data.

Applied Project in Luxury

This course aims to provide students with practical experience in the luxury industry by working on real-life projects and presenting their findings and recommendations to relevant companies. Throughout the semester, students will engage in hands-on, experiential learning, applying their knowledge and skills to solve real challenges faced by luxury brands. The course will focus on developing critical thinking, problem solving and communication abilities while also deepening students' understanding of the luxury market and its unique dynamics.

AND ONE GENERAL EDUCATION ELECTIVE:

French Beginners

The aim of this course is to introduce students to French language and culture. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business context to enable students to communicate effectively at a beginner's level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

French Elementary

The aim of this course is to further develop a student's abilities to communicate in French. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business context to enable students to communicate effectively at an elementary level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

French Intermediate

The aim of this course is to further develop a student's abilities to communicate in French. The focus will be on listening, reading, speaking, and writing. Learning activities focus on business contexts to enable students to communicate effectively at an intermediate level. The course corresponds to the Common European Framework of Reference (CEFR), level A2.

Spanish Beginners

The aim of this course is to introduce students to Spanish language and culture. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business context to enable students to communicate effectively at a beginner's level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

Spanish Elementary

The aim of this course is to further develop a student's abilities to communicate in Spanish. The focus will be on listening, reading, speaking, and writing. Vocabulary and activities will be based around a business context to enable students to communicate effectively at an elementary level. The course corresponds to the Common European Framework of Reference (CEFR), level A1.

Spanish Intermediate

The aim of this course is to further develop a student's abilities to communicate in Spanish and culture. The focus will be on listening, reading, speaking, and writing. Learning activities focus on business contexts to enable students to communicate effectively at an intermediate level. The course corresponds to the Common European Framework of Reference (CEFR), level A2.

Intercultural Communication, Collaboration and Negotiations

The aim of this course is to prepare students for the world of work where interpersonal skills are key. This course will cover three main aspects of communication and collaboration: interpersonal communication, intercultural communication and widely understood teamwork, with aspects of collaboration and conflict resolution. It is designed to build student skills in a gradual way by first focusing on communication techniques between individuals and groups. It then deepens the knowledge of communication by looking at particular cultural differences which might impact how communication is dealt with and received around the globe. International Relations

The course is designed to immerse students in dynamic global international relations and political systems in an era of shifting borders, restructuring economies and regional realignments. The course covers the interactions of stakeholders at an international level, including states and non-states, such as the United Nations, Amnesty International and European Institutions. More precisely, the course introduces concepts of global governance, diplomacy, foreign policy, political economy, and international security, and examines the evolution of international relations in the 20th and 21st centuries.

SEMESTER 5 – MANAGEMENT PRACTICE

SEMESTER DESCRIPTOR

Goal: To reflect upon managerial competencies in the workplace.

In this semester, students return to industry and reflect on managerial competencies and challenges experienced in the world of work. At the same time, students should shape their understanding of real-life managerial approaches, philosophies and practices. The second internship should develop students' career and personal development aspirations.

Upon successful completion of the internship, students should be able to effectively apply problem-solving techniques and critical thinking skills and demonstrate their development as an individual contributor and a valuable team member.

COURSE OVERVIEWS

Internship

In the course, students should acquire the necessary knowledge and tools to search for and obtain a professional internship. The ensuing 24-week placement should provide students with high-quality training designed to enhance professional competence and enrich personal development. This internship will ideally take place in a different work environment from the first and students should be able to review and explore the experiences of supervisors or managers in a workplace. The internship experience should focus on future career preparation and the development of competencies that can be further developed after graduation.

Reflection on Management Practice

The aim of this course is to link academic knowledge with industry experience gained in the semester five internship. Core theoretical principles and perspectives associated with the world of hospitality will be reviewed, notably customer satisfaction management and the roles of training and development and leadership. Students will also reflect on their experiences and recognize the development needs of their own professional competencies and transferable skills. They should also develop problem-solving and research competencies, which will be key to their final year of studies.

SEMESTER 6 – STRATEGIC LUXURY LEADERSHIP

SEMESTER DESCRIPTOR

Goal: To integrate the skills, knowledge and experience gained to manage potential uncertainty at a strategic level.

In this semester, students are immersed in developing competencies to implement successful business strategies. Students are expected to develop a strategic mindset and apply business theory to complex and ambiguous scenarios and be able to recommend strategic alternatives at a corporate and business unit level.

Upon successful completion of the semester, students should have developed their core business acumen in preparation for their final semester and Bachelor Thesis or Applied Business Project.

COURSE OVERVIEWS

Strategic Management of Luxury Brands

This course is designed to provide students with a comprehensive understanding of the unique challenges and opportunities in managing luxury brands. It focuses on developing strategic thinking and the analytical skills necessary for successful brand management in the luxury industry.

International Markets and Finance

This course gives students a comprehensive understanding of the global financial system and the dynamics of international markets. It aims to develop students' knowledge and skills in analyzing and navigating the complexities of international finance and exploring the opportunities and challenges of conducting business in a global context.

Leadership Skills for Change Management

This course introduces a wide variety of contemporary theoretical approaches that will enable students to discover and develop their leadership skills within their organizational and business environments. As future managers, students will be able to put in place relevant strategies to navigate through change, crisis and risk management. Knowing how to use these strategies will help students understand how their leadership style can impact organizational function. This course allows students to select the most appropriate management tools to ensure a positive outcome depending on the business situation.

Retail and Physical Distribution Channels

This course aims to provide students with a comprehensive understanding of the retail industry and the role of physical distribution channels in luxury retail. Throughout the course, students will explore various topics related to the retail sector and how luxury brands utilize physical distribution channels to reach their target customers effectively. The course will emphasize both theoretical knowledge and practical applications to develop students' skills in analyzing, strategizing and managing retail and distribution operations in the luxury industry.

Building Brand Equity in Luxury

This course provides students with a comprehensive understanding of the strategies and techniques involved in building and managing brand equity in the luxury industry. Through a combination of theoretical concepts, case studies and practical exercises, students will develop the knowledge and skills required to create, position and sustain successful luxury brands.

Supply Chain Management

This course aims to provide students with a comprehensive understanding of supply chain management principles and practices in the context of the luxury industry. By exploring the intricacies of supply chain management, students will develop the necessary skills to optimize the flow of goods and services, enhance customer satisfaction and maximize overall business performance.

Design Thinking for Luxury

This course provides students with a comprehensive understanding of the principles and application of design thinking in the context of the luxury industry. By integrating design thinking methodologies with luxury management concepts, students will develop a unique skill set to tackle complex challenges and innovate in the luxury sector.

Deans' Series and Networking - New Frontiers in Luxury

An innovative project organized by students in collaboration with the faculty, this course aims to provide students with unique insights into the ever-evolving luxury industry and foster meaningful connections with industry professionals. It gives students a unique opportunity to explore the latest trends and emerging frontiers in the luxury industry through engaging lectures, panel discussions and networking sessions with industry experts.

Events and Experience Design in Luxury - Career Days

An immersive learning experience organized by the Career Department in collaboration with student support. This project aims to provide students with practical knowledge and hands-on experience in planning and executing luxury events and designing exceptional experiences in the luxury industry.

SEMESTER 7 – LUXURY IN THE CONTEMPORARY AGE – BACHELOR THESIS OR APPLIED BUSINESS PROJECT

SEMESTER DESCRIPTOR

Goal: To develop skills, knowledge and experiential learning in luxury business. Students also need to complete a Bachelor Thesis or Applied Business Project that generates innovative solutions, fostering innovation, sustainability and an entrepreneurial mindset.

In this semester, students engage in advanced studies in luxury business, with a focus on innovations, sustainability and entrepreneurship. They are required to show creativity and innovation in conceptualization, contemporary approaches in problem solving and conflict resolution and demonstrate openness to new or novel ideas.

Upon successful completion, students should have developed key cognitive skills and be able to demonstrate confidence and flexibility in managing complex problems. They should also be able to reflect on specialist knowledge and argue from competing perspectives.

COURSE OVERVIEWS

Omnichannel Sales in Luxury Industries

This course aims to provide students with a comprehensive understanding of omnichannel sales strategies and their application in the luxury industry. It focuses on the integration of various sales channels to create a seamless and personalized shopping experience for luxury consumers.

Sustainable Luxury and Design

This course focuses on the intersection of sustainability and luxury in the context of design. It explores the increasing importance of incorporating sustainable practices into the luxury industry and how design plays a crucial role in achieving sustainable luxury.

New Technologies in Luxury Businesses

Designed to provide students with a comprehensive understanding of the impact and integration of emerging technologies in the luxury business industry. This course aims to equip students with the necessary knowledge and skills to navigate the rapidly evolving digital landscape in the luxury sector.

Entrepreneurial Challenge

This project aims to provide students with an opportunity to showcase their entrepreneurial skills and apply the knowledge and expertise gained throughout their academic journey. It serves as a platform for students to develop and present their innovative business concepts in the luxury industry. Students work in teams, applying their knowledge of luxury business principles, market dynamics and consumer behavior. The project spans a semester, with guidance from faculty specializing in entrepreneurship. Concepts are presented to a jury of luxury industry experts for evaluation.

AND ONE OF THE FOLLOWING CAPSTONE ELECTIVES:

Bachelor Thesis

The thesis is a culminating academic work that forms the capstone of a research of Bachelor's degree program. The course is to accomplish academic research independently to write a 10,000-word study on a chosen topic in either the luxury brand strategy, international hotel development and finance, or international event management specializations. One-to-one tutoring is held on a regular basis, but overall emphasis of the course is placed on self-regulated learning and research activities. Students are required to present critical review on existing literature on chosen topic areas, develop a conceptual framework, conduct appropriate primary research with relevant methods, analyze collected data to build arguments and develop discussion. Major findings need to be recapitulated and conclusions are drawn with evaluation and syntheses.

Applied Business Project

The applied business project is a business research-based capstone that consolidates student's knowledge and skills acquired throughout their studies. Students will work as consultants and solve a real-life business problem for an industry partner. Ideally topics will be within one of the following specializations: luxury brand strategy, international hotel development and finance, and international event management. Based on the mission given by the client, students will be responsible for setting objectives, reviewing relevant industry-based and academic-based literature, selecting appropriate research methodologies, collecting and analyzing data, and providing the client with sound recommendations.

Graduate programs

MSc in International Hospitality Business

CONCEPT OF THE MASTER'S PROGRAM

The overall aim of the MSc program in International Hospitality Business is to prepare students for accelerated careers in leading global hospitality companies. The students will build upon prior education and experiences to further develop their managerial and leadership skills to meet the requirements of their ambitious career aspirations in the industry. Immersed in a multicultural hospitality environment, they will be exposed to best-practice managerial theories and industry applications to nurture their business acumen and grow their professional and inter-personal competencies. Teaching and learning techniques include transformative, didactic, experiential, student-focused, industry-based and technology supported approaches.

GRADUATE PROFILE

Glion Master's graduates are international hospitality business professionals with a well-rounded knowledge of industry fundamentals and leadership behaviors, together with strategies for enhancing performance and driving revenue. Graduates adopt innovative approaches and make informed decisions in a responsible way in today's highly complex and rapidly evolving environment. At the managerial level, graduates take initiatives and accept accountability at both operational and strategic levels in local and global contexts.

LEARNING OUTCOMES

Upon graduation, students from the MSc program should be able to:

- Demonstrate specialized understanding of the international hospitality industry, enabling them to perform successfully at the managerial level
- Generate innovative solutions by analyzing and evaluating complex, unpredictable and volatile contexts
- Exhibit confident and effective interpersonal and communication skills in a range of complex and specialized contexts
- Demonstrate managerial skills, take initiatives and make decisions in a responsible way, accepting full accountability for the outcomes
- Constantly improve their own and others' performances through team efforts
- Develop as an effective industry professional through continuous reflection on experience in a systematic and balanced way

PROGRAM STRUCTURE

The MSc program is a 1.5-year program of study divided into units of study called courses or modules. Each course or module is assigned a specific number of credits. There are 36 credits attempted during the program of study and all courses or modules must be passed. All students are registered for an MSc in International Hospitality Business.

PRE-SESSIONAL – HOSPITALITY IMMERSION PROGRAM (OPTIONAL)

Courses	Credits
Hospitality Immersion Program	0
Total number of credits	0

Required courses	Credits
Business Research Project or Internship	5
Total number of credits	5

Semester descriptors and course overviews

PRE-SESSIONAL: HOSPITALITY IMMERSION PROGRAM

SEMESTER DESCRIPTOR

Goal: To practice hospitality operational skills and develop the art of hospitality excellence.

During these four weeks of intense industry practicum, the teaching and learning is designed to provide students with practical and transferable skills within a real-life simulated boutique hotel environment. The Hospitality Immersion Program consists of kitchen, restaurant, front desk and rooms division operations and associated theory.

Upon successful completion of the module, students should be able to understand the excellence required in hotel operational departments and apply practical and professional competencies.

COURSE OVERVIEWS

Hospitality Immersion Program

This course allows students to acquire the operational skills, knowledge and abilities fundamental to performing tasks and duties in the different hotel departments, such as: Rooms Division, Food and Beverage and Front Office. This practical work will foster the development of lifelong qualities to include professional appearance and behavior, functional skills and personal and social skills. Demonstrations and simulations performed by the students in the different sectors of a hotel will help familiarize them with professional working techniques and communication in a multicultural environment.

SEMESTER 1 – HOSPITALITY MANAGERIAL FUNDAMENTALS

SEMESTER DESCRIPTOR

Goal: To develop professional management and business capabilities within a specialized hospitality context.

In this semester, students will be taught to critically think through key management subjects and business scenarios related to the industry, sometimes at the forefront of knowledge. Students are expected to develop and demonstrate the high levels of responsibility and autonomy required of industry managers. Subjects include hospitality operations, services marketing, accounting and finance, revenue management and leadership. During the field trip, students will put their knowledge to the test in real hospitality settings.

COURSE OVERVIEWS

Managing Hospitality and Luxury Operations

Effective organization of resources and close collaboration between internal and external players are fundamental to increasing customer satisfaction, value creation and quality management. During this course, students learn to assess and recommend various complex operational management tools and techniques to sustain a successful hospitality business, including in the luxury sector.

Revenue Management and Pricing Strategy

Revenue Management aims at optimizing the revenue (topline) performance and profitability of service firms such as hotels, airlines and so on. Students will explore the foundations and advanced concepts of Revenue Optimization with a focus on hospitality in order to improve the total net revenue of companies: how to forecast demand, control inventory and availability, set and monitor a pricing strategy, managing distribution channels.

Managerial Accounting and Financial Analysis

This course is designed to provide students with solid practical accounting knowledge and the analytical tools required when making management decisions for planning, organizing, directing and controlling a firm's operations in the hospitality industry. Contemporary managerial accounting topics covered in the course include: responsibility accounting, USALI balance sheet, USALI income statement, statement of cash flow, cost concepts and cost-volume-profit analysis.

Marketing Management for Hospitality Leaders

This course has been developed to give aspiring industry managers a critical appreciation of marketing services in the international hospitality industry. Due to the special characteristics of services and the challenges associated with communicating and delivering intangibles, an in-depth understanding of what consumers want and how they think and behave is at the core of this subject. This course will explore how hospitality providers need to anticipate and meet the needs of the marketplace, position their messages and subsequently deliver their services to meet customers' expectations and perceptions amid changing societal expectations.

Adaptive Leadership to Connect People Across Cultures

This course is designed to introduce a variety of leadership frameworks around individual excellence, collective orientation and leading in adversity that will allow students to discover and develop their leadership individually and as part of a team within multicultural, organizational and business environments. Students through a highly dynamic learning process, critically examine and debate on concepts and case studies within their multicultural and gender diverse peer groups to enhance their knowledge of the field. Globalization has led to a critical need for well-trained, adaptable leaders and managers that can effectively interact in a variety of multi-diverse contexts.

Leading Digital Strategy

This comprehensive master's-level course is designed to equip students with the essential skills and strategic mindset required to excel in the dynamic field of digital strategy leadership. With a strong emphasis on both the theoretical foundations and practical applications, students will embark on a transformative learning journey, preparing them to navigate the evolving digital landscape with confidence and ingenuity. The course will specifically cater to the hospitality industry. By delving into key digital platforms, emerging technologies and strategic frameworks, students will gain the expertise needed to drive organizational success in the digital age. By the end of this course, students will emerge as forward-thinking digital strategists equipped to navigate the complexities of the digital landscape, deliver innovative solutions and drive sustainable success for organizations in the ever-evolving hospitality industry.

Project Management Methods

This course provides a comprehensive coverage of contemporary project management methodologies and techniques for an effective project organization. The emphasis is on the importance of utilizing the current project management body of knowledge when initiating and planning for successfully completing projects. The importance of anticipating and planning for the various project management constraints are the key elements of this course. Students will also be able to use project management software in order to accomplish several stages of the project's life cycle. ____

Field Trip - Managing Service Excellence in Hospitality

The field trip is designed to achieve several key objectives. Firstly, it aims to provide students with practical exposure to real-world business environments, allowing them to apply theoretical concepts learned in the classroom to actual business settings. Secondly, the experience seeks to foster entrepreneurial thinking by immersing students in innovative and dynamic companies, where they can witness firsthand the strategies and practices that drive successful practice. Additionally, the field trip aims to enhance students' networking opportunities by facilitating interactions with industry professionals and entrepreneurs, creating valuable connections for future career prospects. The contents of the trip will include visits to a diverse range of businesses, discussions with successful entrepreneurs, and opportunities to analyze and present case studies relevant to their chosen area of study. Overall, the field trip is designed to enrich students' academic experience and prepare them for future leadership roles in the business world.

SEMESTER 2 – LEADERSHIP SKILLS IN HOSPITALITY

SEMESTER DESCRIPTOR

Goal: To develop advanced thinking and competencies required for senior management roles in managing and leading hospitality organizations.

During this second semester, students will be exposed to greater complexity to develop the strategic thinking, organizational and people management skills required of senior leadership in volatile, uncertain and ambiguous situations. This may require integrating knowledge from several fields and contributing original and innovative thinking to problem solving and decision making. Subjects include higher level management and business subjects, research and project management.

COURSE OVERVIEWS

Hospitality Business Strategies

This course considers the challenges and opportunities in the hospitality industry and explores strategies used by hotel firms to gain sustainable competitive advantage. It concentrates on entry mode, strategic alliances and diversification strategies in the hospitality industry and compares multiple perspectives on strategy with the aim of helping students become analytical and creative strategic thinkers.

People Management in a Global Environment

This course is designed to provide students with an understanding of the significance of People Management for contemporary businesses operating in a dynamic global environment. It will draw on disciplines such as Human Resources, Organizational Behavior and Talent Management to provide students with the opportunity to develop and apply their practical people management skills in an international business context. Through discussing and critically analyzing both theoretical models and current practices, students will explore issues concerning the global challenges faced by companies and managers in key areas of people management. Lectures are complemented by group discussions and individual assignments, in addition to practical applications that allow students to reflect on and evaluate current industry practice.

Hospitality Corporate Finance

The aim of this course is to provide students with the tools needed to understand the various investment decisions a corporation has to make within an international environment and to assess their financial viability. Through the use of case studies, students will learn how to evaluate financial risk, analyze the different sources and costs of financing and assess the value of a project. They will examine the use of derivative instruments to hedge the financial and operational risks a multinational corporation faces.

Applied Business Research

The purpose of this course is to help students to conduct applied research into business problems in organizations. It provides rigor, precision and detail in inquiring terms, linked to practical problem-solving actions and activities. The use and integration of principles, methods and techniques will be drawn from relevant literature to help inform and frame the problem or problem-solving activity. This use of principles, methods and techniques will be applied in a critical and evaluative manner. The requisite inquiry skills taught in this course are crucial for problem-solving businesses and organizations. They are an essential component of a practical, Master's-level education and provide an intellectual underpinning for business practitioners.

Hotel Asset Management and Concept Creation

A crucial role for today's senior hotel professionals is to enhance value for a hotel owner by understanding the business from their perspective. This course will introduce students to the industry's main stakeholders, its business models and the brand-expansion strategies open to investors. Students will have the opportunity to create a differentiated hotel concept within a highly competitive marketplace.

Food and Beverage Retail Entrepreneurship

This course will take students through the iterative process of building a business model for a next-generation food and beverage concept. It begins with the exploration of all the potential types of revenue streams tomorrow's operations should consider incorporating. The course further expands on considerations that need to be given towards sustainability, an expectation of the next generation of consumers as well as an opportunity based on technological evolution. Future-proofing measures will be assessed to anticipate possible operational disruptions that might impact the business when confronted with crises in the future. Finally, students will be exposed to the various opportunities for securing and meeting the business model's financial requirements.

Luxury Brand Management

This course has been developed to introduce students to the concept of brand management in the context of international luxury hotel businesses. It looks specifically at elements of a brand and the strategies adopted to create and manage brands that are recognizable in various destinations but at the same time remain true to their personality. The course requires students to apply their knowledge of marketing management to ensure consistency of the brand and its relevance for the desired target market.

Sustainability Essentials for Hospitality Managers

Environmental sustainability in the hospitality industry is now topping business agendas, while at the same time hospitality firms are assuming greater responsibility for helping solve complex social issues. Environmental and societal pressures have reached a tipping point and sustainable development is no longer considered a luxury but a necessity for long-term competitiveness and survival, particularly in an industry so highly dependent on human and natural resources. While highlighting the key risks and opportunities of sustainability for hospitality companies, this course will balance theory and practice with the contribution of hospitality professionals.

Hospitality Networking Series

This course is designed for students to carry out applied industry research with a leader in the world of hospitality. The students will identify an industry practitioner of their own choosing and, with their participation, will then execute a piece of primary research. The aim is to extend students' knowledge and understanding of a managerial concept through the expertise of the participant/s. The research will take the form of an interview delivered in a classroom environment, with pre-prepared, semi-structured interview questions supplemented by questions from the audience (the other members of the class). The industry knowledge gained is then to be assessed in relation to the theoretical perspectives learned during their GIHE studies. Ample networking opportunities will be provided during this course.

SEMESTER 3 – BUSINESS RESEARCH PROJECT OR INTERNSHIP

SEMESTER DESCRIPTOR

Goal: To demonstrate the ability to plan and execute an independent research project within a defined time-period or working in a placement for a duration of six months.

If students opt for the Business Research Project, they will be required to produce an independent research project demonstrating advanced research skills, planning and self-management abilities as well as agility in information handling.

If students choose to undertake a six-month internship, they will carry out a work placement and produce a reflective essay. Students will use a reflective model and an experiential learning cycle to examine their internship experiences so they develop via self-reflection on at-work practices and enhance their employability.

COURSE OVERVIEWS

Business Research Project

This is an individual academic research project that requires self-regulated learning and independent research activities. Students must identify, analyze, conceptualize and carry out research into a business problem based on one of the major themes and concepts studied during the program. The project may also focus on a diagnostic review of an existing or past organizational problem. Major findings should be presented and two solutions or recommendations should be proposed with syntheses and evaluations.

Internship

The aim of the internship is for students to further their professional development by integrating theory and practice. The internship provides an opportunity to explore career alternatives, deepen specific career-related interests and build the skills necessary for career progression upon graduation. An integral part of the internship experience is the reflection in which students have an opportunity to critically analyze their experiences and responses to specific situations and set goals for future development.

MSc in Luxury Management and Guest Experience

This program is taught in Switzerland only.

CONCEPT OF THE MASTER'S PROGRAM

The overall aim of the MSc program is to educate managers for the luxury industry, following the philosophy of hospitality: sense of service, uncompromised excellence, attention to detail, leadership via service and humility and creating unique customer experiences. The program introduces students to traditional and advanced business courses, with focus on retail and omnichannel experience, digital and sustainable business. The students are immersed in practical and experiential learning through a field trip, company visits, workshops with businesses and the organization of the Luxury Event, which is worked on throughout the program. Teaching methods will be based on real-world case studies and projects before students embark on a six-months internship or business research project within the luxury sector.

GRADUATE PROFILE

Glion Master's graduates are global professionals specializing in luxury and guest experience, conjugating managerial and business skills with a hospitality attitude.; namely sense of service, uncompromised excellence, attention to details, leadership via service and humility, and a focus on the creation of unique luxury experiences. Graduates are able to find and critically process information from reliable sources to take responsible and sustainable decisions in a highly volatile, uncertain, complex and ambiguous environment. Graduates are also able to create value in the hyper-competitive luxury market. At the managerial level, graduates accept accountability in a responsible way, developing their own and other individuals' talents and transforming the working environment at operational and strategic levels based on local contexts.

LEARNING OUTCOMES

Upon graduation, students from the MSc program should be able to:

- Demonstrate managerial, behavioral and transformational skills crucial to work in luxury markets and to face the future challenges of luxury industries
- Ensure a guest experience tailored on the specificities of luxury customers by implementing cutting-edge processes and best practices in complex environments
- Take responsible decisions within the complexity of the luxury industry, with a critical understanding of its heritage, tradition and culture and the need for innovation and creativity
- Manage complex projects within the luxury business environment.
- Constantly improve their own and others' performances through team efforts
- Develop as an effective luxury industry professional through continuous systematic reflection

PROGRAM STRUCTURE

The MSc is a 1.5-year program of study divided into units of study called 'courses' or 'modules', each of which is assigned a specific number of 'credits'. There are 36 credits attempted during the program of study and all courses or modules must be passed. All students are registered for an MSc in Luxury Management and Guest Experience.

PRE-SESSIONAL – HOSPITALITY IMMERSION PROGRAM (OPTIONAL)

Courses	Credits
Hospitality Immersion Program	0

Semester descriptors and course overviews

PRE-SESSIONAL: HOSPITALITY IMMERSION PROGRAM

SEMESTER DESCRIPTOR

Goal: To practice operational skills and develop the art of hospitality excellence.

During these four weeks of intense industry practicum, the teaching and learning is designed to provide students with practical and transferable skills in a real-life simulated boutique hotel environment. The practical arts semester consists of kitchen, restaurant, front desk and rooms division operations and associated theory.

Upon successful completion of the module, students should be able to understand the excellence required in hotel operational departments and apply practical and professional competencies.

COURSE OVERVIEWS

Hospitality Immersion Program

This course allows students to acquire the operational skills, knowledge and abilities fundamental to performing tasks and duties within the different hotel departments, such as: Rooms Division, Food and Beverage and Front Office. This practical work will foster the development of lifelong qualities that include professional appearance and behavior, functional skills and personal and social skills. Demonstrations and simulations performed by the students in the different sectors of a hotel will help familiarize them with professional working techniques and communication in a multicultural environment.

SEMESTER 1 – LUXURY BUSINESS ENVIRONMENTS, MARKETING AND BRAND MANAGEMENT, LUXURY EXPERIENCE AND INNOVATION PART I

SEMESTER DESCRIPTOR

Goal: To develop professional management and business capabilities in a specialized luxury context.

In this semester, students will be taught to think critically through immersion in the core concepts and business scenarios related to the luxury industry and at the forefront of knowledge. Students are expected to develop and demonstrate the high levels of responsibility and autonomy required of industry managers and will immediately acquire a highly specialized knowledge in the field. Subjects include Economy and Sociology of Luxury, Business Trends in Luxury Hotels, Resorts and Events, Gastronomy Universe, Fine Wines and Spirits, Ultra-luxury Travel and Experiences, Luxury Fashion Design, Building Brand Equity, Experiential Economics, Data Analytics and Digital Transformation, Digital Marketing in the Luxury Industry. The Intercultural leadership class will take place in this semester to get students comfortable with living and working in a multicultural environment. During the field trip, students will put their knowledge to the test in a real-world context. They also get the opportunity to learn through experience because the important elements of luxury –such as taste, touch and craftsmanship are impossible to acquire in class.

COURSE OVERVIEWS

Intercultural Leadership

Management in a globalized business requires a deep understanding of multinational globalized contexts where remote (transnational, virtual, global) teams are the 'norm' and where exponential technological advances require adaptive cross-cultural communication techniques. Students in this course will learn the significance of cultural differences in everyday work life, expressed through different behaviors and practices. They will also develop leadership skills via enhanced self-awareness and increased sensitivity, curiosity and knowledge of cultures, as well as their own cultural assumptions, biases and implicit preferences. At the end of the course, they will be able to recognize different norms and practices of intercultural communication.

Economics and Sociology of Luxury

This course will provide students with different theoretical frameworks in economics and sociology as they analyze the main characteristics of luxury products and services as economic goods. They will also explore the production and consumption of luxury goods and services and their close relationship with creativity and innovation. The course will additionally provide an overview of the connections between creativity, economic growth and social change, together with social class and status dynamics in society and in markets. Furthermore, the course prepares students for the field trip by providing the due theoretical background so they can maximize the outcomes of this experiential learning opportunity.

Business Trends in Luxury Hotels, Resorts and Events

This course focuses on an analysis of the latest global consumer trends and their effects on hotels, resorts and events in the luxury segment. Students will consider the definition of a trend and how trends impact business structures and practices. In particular, students will become familiar with how companies in hospitality are positioning their products and services in the perspective of the experience economy.

High Gastronomy and Fine Dining

The aim of this course is for students to take a deep dive into the universe of ultra-fine dining. Students will gain an understanding of the rationale behind different business models and critically assess what sets them apart from various produce and concept perspectives. They will compare global product strategies, visions, design features, technological advances and financial performances in the context of their local culture and market environment. Customer journey maps, touchpoints and micro-concepts will be explored through primary research.

Effective Communication

This course focuses on the importance communication has in our professional and personal lives. The program aims to increase awareness of the impact our way of communicating can have on different kinds of people (stakeholders, clients, colleagues) who have different drivers and come from diverse cultural backgrounds. Students will learn the theoretical and practical implications of communication skills, how to communicate with presence and how to adapt their skills when dealing with people who have a different personal preference or cultural background. Students will critically appraise different audience profiles and practice their recently acquired communication skills in a training environment before entering the job market.

Ultra-Luxury Travel and Experiences

The aim of this course is to immerse the students in luxury hospitality travel models with a focus on customer engagement through emotional and experiential engineering. Students will develop analytical skills by examining customer journey maps, touchpoints and micro-concepts to distinguish luxury from ultra-luxury travel. Case studies will enhance students' ability to challenge the status quo and to develop the ability to critically appraise, transfer and apply best in-class learning. Product and service will be explored to develop a differentiation strategy for an ultra-luxury hotel.

Luxury Fashion Design

This course will focus on the luxury side of fashion, a world closely connected with other sectors of the luxury industries (for example, leather goods and accessories, perfumes, watches and jewelry). Students will explore fashions and receive a brief overview of the history of the fashion system born in Paris at the end of the 19th Century. The course will focus on luxury fashion design as a form of production and diffusion of innovation that reverses marketing principles. Particular attention will be paid to the role played by luxury fashion design inside the overall fashion system in fostering innovation and trends and in building value. The importance and the historical development of fashion designers and their role in building the value of luxury fashion will also be explored.

Building Brand Equity in Luxury

In this course, students study the foundations of a luxury brand: its legitimacy, consistency and creativity and the fundamentals of a luxury brand strategy. It specifically focuses on analyzing the key elements and facets of the brand's identity and how they are expressed through marketing communication, the brand's environment and its behavior. The course also examines the strategic importance of luxury brands – for the company and society – and relevance in building brand equity. It also covers how value is created and maintained by managing a brand through its lifecycle and adhering to the principles of luxury branding and marketing.

Experiential Economics

This course will focus on the experience economy in the luxury and hospitality business. It will explore relevant concepts that are meaningful in the experience economy (experience, effects and value). Other course themes include bias in the experience economy, discourse in current literature and the practice and analysis of problems that result from this bias. Based on the dematerialization of the economy, students will discuss why certain rules of the game in economics must change and how this affects both stakeholders and environments. Using their conceptual knowledge, experiences and insight, students will create a new conceptual design for a relevant economic offering that draws on experiential research.

Digital Transformation and Data Analytics

The course aims to explore the concept of digital transformation and its impact on the luxury sector. Big data systems and the opportunities and challenges posed by such systems will be explored. Architectural solutions are investigated with a focus on how they may be used in the luxury sector for analytics and data processing. Students will also appraise specific data systems and apply data analysis to problem solving in the luxury sector.

Digital Marketing in the Luxury Industry

The uniqueness of the luxury industry and all its segments relies on luxury products and services being promoted and distributed with a different logic. Luxury products must target specific niches that are willing to pay a premium price. This course in digital marketing in the luxury industry will provide students with the skills and competencies required to operate in the luxury digital arena and will help them become digital marketing specialists. As part of the course, students will be required to design a digital marketing communication plan for a luxury company.

Service Culture and Operational Excellence

The aim of this course is for students to explore what successful companies do to engage their employees to achieve customer service excellence and how they strategically align all aspects of an organization to lead to outstanding service. Students will analyze what 'service culture' means and investigate how to achieve such a customer service level through genuine service and operational excellence. Students will focus on how product and service delivery are engineered to provide an exceptional service experience and on how authentic customer engagement is increased, leading to increased revenues. They will relate themes such as customer journey, team training, service design and execution to contemporary industry-based examples to create the link between course content, service culture and real-world operational performance.

Design Thinking

This course will be based on the 'Stanford School' model for design thinking. This methodology seeks to answer the question of how to develop solutions that best satisfy the needs of end users with what is feasible, what the company strategy is and how to convert this into added value for the stakeholders. The course will engage students in the design thinking process and problems that may arise. Design methodologies can be considered as the interconnection between creativity and innovation through the generation of innovative ideas proposing real value.

SEMESTER 2 – LUXURY EXPERIENCE AND INNOVATION PART II AND STRATEGIES AND BUSINESS MODELS

SEMESTER DESCRIPTOR

Goal: To develop advanced thinking and competencies required for senior management roles in managing and leading luxury companies.

During this second semester, students will be exposed to the 'hardware' of business education and managerial knowledge to develop the strategic thinking, organizational and people management skills required of senior leadership in volatile, uncertain and ambiguous situations. This may require integrating knowledge from several fields and contributing original and innovative thinking to problem solving and decision making. Subjects include higher level management and business subjects, such as Strategic Management of Luxury Brands, Talent Management, Corporate Finance and Value Creation, Business Models research and Project Management. Students will nurture their critical skills and well as advanced knowledge in business and managerial disciplines and will have the chance to use the specific knowledge about luxury they acquired during the first semester.

COURSE OVERVIEWS

Sustainable Luxury and Design

The course provides students with a critical understanding of the non-negotiable needs and future developments on the topic of Corporate Social Responsibility (CSR) in luxury industries and in particular in luxury fashion and design. Students will critically analyze different business practices in sustainability to learn as consumers and future managers how to face the challenge successfully. The need for more sustainability in luxury and design across all its sectors and segments is linked to both supply and demand drivers. On the supply side, CSR was integrated into company strategies and led to the creation of dedicated departments and start-ups where sustainability is part of their DNA. Demand is strongly driven by LOHAS (Lifestyle of Health and Sustainability) consumers, who are taking buying decisions based on aesthetics.

Blockchain in the Luxury and Hospitality Business

This course will focus on how blockchain technology can be used in the luxury industry. Blockchain technology has three main use-cases: transfer of digital assets, decentralized registries and smart contracts. Each of these will impact the luxury industry through customer experience, the secondary market and an increase in traceability for the production and distribution of luxury goods. Students will acquire knowledge through direct learning, then explore these applications and more by studying real-life use-cases and building concrete projects.

Impactful Design for Retail and Hospitality

This course focuses on understanding how design principles contribute to transforming retail and hospitality spaces in the luxury segment. Students will understand the basic functions of retail store operations and desired customer experience when envisioning innovative design. They will also examine contemporary hospitality concepts in design perspective in connection with desired service promise.

Retail Management

Retail Management covers many fields of general management because, while the main responsibility of a store manager is to maximize profit, he/she must also ensure the commercialization of a brand's products and services and take good care of the brand image, which is made directly available and materialized in the store for the customer experience. Retail management covers areas such as market trends, operations, supply chain and human resource management, merchandising and digital technologies - in particular in the light of an integrated omnichannel perspective - as well as customer relationship management (CRM) and operational marketing and branding. In contemporary retail, particular attention is paid to the creation of an immersive guest experience. This course is therefore not only about the management of the retailing mix, but is also focused on the creation of an integrated 'phygital' guest experience for omnichannel retail in the luxury industries.

Strategic Management of Luxury Brands

The aim of this course is to provide students with the analytical skills and the tools to create and develop a coherent strategy for a luxury company. In particular, it will develop students' ability to understand, critically appraise and use financial indicators, KPIs and the appropriate organizational tools and procedures needed to develop a successful strategy, from vision to objectives, in the luxury industries.

Talent Management

In a changing world, companies need an integrated approach to attracting, developing, engaging and retaining critical talent to anticipate upcoming needs and challenges. This is even more true for the luxury industry, based as it is both on heritage and tradition as well as creativity and innovation. Luxury companies must therefore focus more than other companies on developing employee talent, supporting the continuous development of knowledge, innovation and creativity and ensuring the transmission of their heritage and craft-based processes. They also need to be actively engaged in ensuring work/life balance and lifelong personal development. In this course, students will learn strategies and techniques for successful talent management in luxury companies.

Corporate Finance and Value Creation

This course aims at familiarizing students with the concepts of financial decision making, with an emphasis on luxury conglomerates. It will review the theory and practice of capital budgeting decisions and shareholders' value creation. The time value of money, net present value and corporate valuation concepts will be defined and applied to case studies on financial decision-making within the luxury industry. Students will analyze financial statements and company reports to assess the financial strategy, the business model and the profitability of their operations.

Business Models

This course aims to provide students with insights into how successful companies develop, implement and create value through well-designed business models. Cases will be drawn from the luxury industry highlighting the best practices applicable to this sector. During this course, students will learn how to identify business ideas and how to put them into practice. Students will apply state-of-the-art management tools geared at creating actionable business models. They will work in teams to create an original business model for a company in the luxury sector.

Legal Environment of the Luxury Industries

The course explores the legal environments in global luxury industries. The importance of Intellectual Property (IP) rights will be reviewed based on disruptive innovation, including gastronomy and food, luxury fashion design and ethics, with a specific focus on counterfeits and mass production in developing countries. Infringement, enforcement and licensing of IP based on imports and exports will form the basis of this course. Students will critically evaluate and apply the principles of IP to minimize risk, create value, attain core business objectives, identify and resolve legal issues and effectively handle legal disputes.

Behavioral Aspects of Customer Engagement

This course focuses on the luxury market and its impact on new levels of customer experience touchpoints, online and offline. Part of the course is dedicated to selling ceremony analysis, having a customer-centric approach at heart and the role played by CRM (also covered during the course) in the journey. Particular emphasis is given to behavioral aspects of customer engagement, when students will learn how to apply some 'Neuromarketing' and 'Behavioral Economics' principles to the analysis of the relationship between consumers and luxury brands.

Business Research Methods

The purpose of this course is to help students conduct applied research into management. It enables students to establish or advance their understanding of research through the critical exploration of research language, ethical principles and methodology. The course will include problem identification, research design strategies, reviewing the literature and the collection and analysis of field data. These skills are crucial for problem solving, decision making and strategic planning.

Luxury Event

In this course, in which they will learn to evaluate the principles of event management for a luxury company, students will be asked to produce a real-life luxury branded event. They will be actively engaged in the design, planning, promotion, delivery and dissemination of an event in a professional setting and will then be able to critically assess the success factors of luxury events and provide effective dissemination of the event organized. The choice of the appropriate location for the event can represent the goal of a dedicated learning journey.

Field Trip

The field trip is designed to achieve several key objectives. Firstly, it aims to provide students with practical exposure to real-world business environments, allowing them to apply theoretical concepts learned in the classroom to actual business settings. Secondly, the experience seeks to foster entrepreneurial thinking by immersing students in innovative and dynamic companies, where they can witness firsthand the strategies and practices that drive successful practice. Additionally, the field trip aims to enhance students' networking opportunities by facilitating interactions with industry professionals and entrepreneurs, creating valuable connections for future career prospects. The contents of the trip will include visits to a diverse range of businesses, discussions with successful entrepreneurs, and opportunities to analyze and present case studies relevant to their chosen area of study. Overall, the field trip is designed to enrich students' academic experience and prepare them for future leadership roles in the business world.

SEMESTER 3 – BUSINESS RESEARCH PROJECT OR INTERNSHIP

SEMESTER DESCRIPTOR

Goal: To demonstrate the ability to plan and execute an independent research project within a defined time-period or working in a placement for a duration of six months.

If students opt for the Business Research Project, they will be required to produce an independent research project demonstrating advanced research skills, planning and self-management abilities, as well as agility in information handling.

If students choose to undertake a 6-month internship, they will undertake a work placement and produce a reflective essay. Students will use a reflective model and an experiential learning cycle to examine their internship experiences, in order for them to develop their personal growth via self-reflection on practices at work and enhance their employability.

Internship

Students will further their professional development through their experiential learning and critical reflection. Students will use a reflective model and an experiential learning cycle to examine their internship experiences. They will reflect critically on these experiences and on relevant theoretical knowledge to create a new synthesis of theory and practice as a means of professional development.

Business Research Project

The business research project is a culminating academic research-based work that forms part of the Master's program. One-to-one and group tutoring are held on a regular basis, but the overall emphasis of the course is placed on self-regulated learning and research activities, in agreement with a selected company. Each student is required to develop, analyze, synthesize and discuss a business problem based on one of the major themes and concepts studied during the taught part of the program; the project can also be focused on a diagnostic review for an existing or past organizational problem. Major findings need to be recapitulated and different possible solutions are drawn with evaluation and syntheses.

MSc in Hospitality, Entrepreneurship and Innovation

This program is taught in Switzerland only.

CONCEPT OF THE MASTER'S PROGRAM

The overall aim of this MSc program is to shape the future of students in the hospitality and services industries with a clear focus on smart technology, meaningful experience, innovation process design and the sharing economy. Through this program, students will become equipped with the skills and tools necessary to innovate the customer experience, create new processes, push for digitalization and business transformation and revolutionize the hospitality industry. The uniqueness of this program is demonstrated by combining the hospitality knowledge of experienced Glion faculty with the entrepreneurship and innovation of industry experts.

GRADUATE PROFILE

Glion MSc graduates are hospitality-based professionals specializing in entrepreneurship and innovation. They will focus on the development of meaningful customer experiences and the creation of products and processes that add value to new or existing environments. Graduates adopt transformative and revolutionary approaches and make informed, responsible decisions in today's highly complex and rapidly evolving environment. At the managerial level, graduates take initiatives and accept accountability at operational and strategic levels in local and global contexts.

LEARNING OUTCOMES

Upon graduation, students from the MSc program should be able to:

- Demonstrate specialized understanding of entrepreneurship and innovation, enabling them to identify new markets and opportunities for hospitality industries
- Use cutting edge and relevant business tools to generate value and suggest innovative, transformative, sustainable and revolutionary solutions in complex, unpredictable and volatile contexts
- Exhibit confident, persuasive and effective interpersonal and communication skills to manage in a complex and specialized context in hospitality-based industries
- Deliver social value in hospitality and related industries through their ethical and critical thinking
- Anticipate and manage future challenges with innovative solutions
- Demonstrate managerial skills, take initiative and make decisions in a responsible way, accepting full accountability for the outcomes
- Constantly improve their own and others' performances through team efforts
- Develop as an effective industry professional through continuous reflection in a systematic and balanced way

PROGRAM STRUCTURE

The MSc is a 1.5-year program of study divided into units of study called 'courses' or 'modules', each of which is assigned a specific number of 'credits'. There are 36 credits attempted during the program of study and all courses or modules must be passed. All students are registered for an MSc in Hospitality, Entrepreneurship and Innovation.

Semester descriptors and course overviews

PRE-SESSIONAL: HOSPITALITY IMMERSION PROGRAM

SEMESTER DESCRIPTOR

Goal: To practice hospitality operational skills and develop the art of hospitality excellence.

During these four weeks of intense industry practicum, the teaching and learning is designed to provide students with practical and transferable skills within a real-life simulated boutique hotel environment. The hospitality Immersion Program consists of kitchen, restaurant, front desk, rooms division and operations, and associated theory.

Upon successful completion of the module, students should be able to understand the excellence required in hotel operational departments and apply practical and professional competencies.

COURSE OVERVIEWS

Hospitality Immersion Program

This course allows students to acquire the operational skills, knowledge and abilities which are fundamental to performing tasks and duties within the different hotel departments, such as: Rooms Division, Food and Beverage Departments and Front Office. This practical work will foster the development of lifelong skills to include professional appearance and behavior, functional skills, and personal and social skills. Demonstrations and simulations performed by the students in the different sectors of a hotel will help familiarize them with professional working techniques and communication in a multicultural environment.

SEMESTER 1 – HOSPITALITY OPERATIONS, DISRUPTIONS, INNOVATION & ENTREPRENEURSHIP: FROM IDEA TO BUSINESS MODEL

SEMESTER DESCRIPTOR

Goal: To develop professional management and business capabilities within the context of creativity, innovation, critical thinking, entrepreneurial spirit and hospitality.

In this semester, students will learn what the hospitality industry is, its challenges and its future issues. They will acquire the abilities, methodologies and concepts required to create value, innovative products and services for the market with a focus on the hospitality industry. Nowadays, the hospitality industry should be more connected, ecofriendly and personalized (mass standardization is over): consumers have new habits and they prefer emotional experiences rather than a simple stay. To overcome these challenges, students will create new products and services with innovative business models. For instance, blockchain for digital payments, use of mobile devices to access the rooms, growth hacking to increase the number of customers, virtual reality to immerse potential clients in the hospitality experience. The first semester focuses on the contribution of entrepreneurship and innovation to the new trends of hospitality. Students will focus on design thinking, lean startups, traction methods, strategic partnerships and ecosystems' management, governance and strategy.

COURSE OVERVIEWS

Industry Fundamentals and Complexity

This course explores organizational and structural challenges and opportunities within hospitality industry. During this course students will execute an in-depth analysis of hotel expansion business models to create a full and accurate landscape of the hospitality and services industry. Multiple perspectives on strategy will be compared with the aim of helping students become both analytical and creative strategic thinkers.

Trends, Disruptive Models and Entrepreneurial Mindset

This course will provide an in-depth insight in the growth factors and trends of the customer behaviour and will address cutting-edge business models in hospitality industry. Together these elements enable an informed view of the current hospitality landscape and the ability to forecast future moves. Students will stimulate an entrepreneurial mindset to address the real-world challenges of today and will develop the skills needed to identify and assess opportunities.

Hospitality Operations

This course will allow students to explore how to organize operational resources effectively. Students will review and evaluate how processes are developed to ensure customer satisfaction, value creation and organizational effectiveness in line with the stated mission, objectives and strategies of a hospitality business.

F&B Management and Value Delivery

This course will allow students to explore how to organize food & beverage (F&B) resources effectively in major industry segments. Students will coordinate internal and external processes to ensure customer satisfaction, value creation and organizational effectiveness in line with the stated mission, objectives and strategies of the company. This understanding of F&B management and value delivery, including operations, purchasing/controls and quality assurance, will help students create useful financial statements for successful business planning.

Leadership, Team Building and Intercultural Management

This course investigates the major principles relating to leading and managing across cultural and national boundaries. Students will critically examine concepts from their own multicultural and gender perspectives to enhance their mastery of the complexity of contemporary leadership and management. Through this development, students will learn how to be collaborative team members and contribute to an effective team dynamic that will result in synergistic and interdependent teams.

Creativity and Innovation in Hospitality

In this course, students will have the opportunity to develop their creativity and to imagine new hospitality concepts linked to key trends in hospitality and tourism, and open source innovation. Students will review state-of-the art theoretical and applied models of creativity and innovation. The students will challenge innovative changes based on business models used by early adoptive industries.

Design Thinking Start-up Creation Process

This course will be based on the Stanford School Model for design thinking. This methodology seeks to answer the question of how to develop solutions and best satisfy the needs of end users. Students will review what is feasible and how future existing enterprises or startup can use design thinking to add value to stakeholders. The course will engage the students in the design thinking process and problems. Design methodologies can be considered as the interconnection between entrepreneurial thinking and innovation through the generation of innovative ideas.

Business Model Identification: Lean Startup and Traction Methods

This course aims to provide students with experiential learning, which shows students how startups and new ventures are created. Management tools built around a business model will be applied. During this course, students will learn how to identify a business idea and how to put into practice. They will work in teams on a real start-up project and will present their customer experience discovery.

Partnerships and Ecosystem Management

This course considers the potential partnership strategies and opportunities in the hospitality industry to gain sustainable competitive advantage and to increase market share. Specifically, the business-to-business partnership is becoming a strong pillar of the product portfolio and a seamless experience. In addition, an ecosystem of partnerships encourages brand loyalty, diversification and strategies alliances.

Strategy and Governance

This course will enable students to review key frameworks and concepts relevant to strategic management and governance in the hospitality industry. It is designed to help them develop an understanding of the influences economic, financial, managerial and environmental factors can have on a business. Students will reflect on the complex nature of governance with regards to boards committee and strategy planning to ensure the successful performance of vision and mission.

Protecting Your Brand and Your Business

This course will cover the legal environment of a hospitality start-up creation. In particular, it will look at the foundations of the international trademark, patent and copyright systems and their remedies and how to infuse the right mix of intellectual property protections in your venture. The course provides students with a practical understanding of legal issues they may face when setting up and protecting their own brand and business in foreign and competitive markets.

Innovation Week

The Innovation Week is an intense experiential learning period structured around a real business challenge. It is led in collaboration with the Inartis Foundation, a nonprofit organization whose purpose is to promote innovation and foster interactions between innovators, companies and research institutes. Throughout the week, students will work in teams to find novel solutions to a given business problem. They will spend time at Inartis Foundation's innovation atelier, where they will prototype and test their concepts to demonstrate the desirability, feasibility and viability of the ideas that emerged. Furthermore, students will learn to pitch their idea by engaging audiences with storytelling to mobilize support and attract investors.

SEMESTER 2 – SCALING YOUR BUSINESS: DIGITALIZATION AND GO-TO-MARKET STRATEGY, TALENT MANAGEMENT AND FINANCIAL LIFECYCLE AND FUNDING

SEMESTER DESCRIPTOR

Goal: To develop the advanced thinking and competencies required to deliver value for customers and implement an innovation strategy.

The second semester is dedicated to delivering value to customers, capturing value and scaling a business. Students will focus on digitalization and go-to-market, sales and marketing, revenue management and digital technologies, with a deep dive into financial lifecycle and funding.

Project Life Cycle for New Business Launches

This practical course will explore the project management stages of new businesses launch process. These new businesses could be start-ups, tech-companies, wineries, organic farms, hotels, restaurants, take-aways, alternative lodging facilities, etc. Students will be required to analyze the project life cycle for new businesses with an emphasis on product and service innovation. Students will explore a methodology on how to define, set-up, plan and execute an innovation project from its origin to completion.

Talent Management

Entrepreneurs in the field of hospitality are increasingly expected to master the art of attracting, developing, engaging and retaining critical talent. This is especially the case in a sector presenting high levels of turnover characterized by fierce competition and vulnerability to the socioeconomic environment. By the end of this course, participants will be prepared to navigate the intricate world of talent management within the hospitality industry. The course aims at providing aspiring entrepreneurs with the tools to attract, develop and retain key talent. By combining theoretical knowledge with practical application, students will develop a deep understanding of key trends affecting talent management and will be able to evaluate the effectiveness of various talent management strategies.

Marketing, Branding and Insights Foundations

During this course, students will develop a strategic approach to marketing management by assessing theoretical models and evaluating their practical application in strategic marketing decision making. Students will understand the consumer journey framework as well as key concepts of branding and digital advertising.

Sales and Contract Negotiation

The art of selling and upselling plays a crucial role in the hospitality sector and has a large impact on the customer experience. During this course, students will acquire the tools and skills needed for successful contract negotiations. A particular focus will be given to preparing the negotiation strategy (stakeholder mapping and planning for a deal). Students will analyze a variety of contracts and practice hands-on negotiation dynamics in an intercultural context.

Revenue Management and Digital Distribution Strategy

Scientific advances in economics, statistics, operations research and information technology have allowed service industries to take a sophisticated, detailed and intensely operational as well as a strategic approach to making demand management decisions. This course will enable students to take optimal decisions and improve revenue and bottom-line performance. It will concentrate on the strategies service firms adopt in the face of the increased disintermediation of traditional distribution channels and evaluate solutions for channel choice decisions and pricing over multiple digital distribution channels.

Digital Technologies in the Hospitality Industry

Technology plays a hugely important role in today's business environment and understanding its stakes and purpose is necessary. Nowadays, the terms Artificial intelligence, Blockchain and Cloud Computing are widely used and misused. The aim of this module is to help students understand the concepts behind these technologies. During this course, students will gain the necessary skills, tools and vocabulary to enable them to communicate and work with people developing such technological components in a hospitality context.

Digital Marketing and Growth Hacking

During this course, students will explore digital business and marketing models as well as the role of data and tools in monitoring, measuring and optimizing digital processes both off site and on site. Students will learn to use clear tools and techniques for 'growth hacking' through the different customer lifecycle stages, enabling them to create a growth hacking strategy for traffic optimization for specific products or services in hospitality.

Fundraising and Financial Strategies

This course will provide students with the fundamental tools and skills to finance start-ups and leverage investment. Students will evaluate the various funding options for start-ups to enable successful selection based on business need. Business plan writing tools will also be explored to help students devise negotiation strategies, secure bullet-proof successful growth and build appropriate exit strategies.

Mergers and Acquisitions

This course focuses on the role mergers and acquisitions (M&A) play in the corporate business development and external growth of hospitality companies. It analyses the complete M&A process, from corporate development, identification of targets, evaluation and due diligence through negotiations and closing strategy to post-merger integration. The historical and latest M&A transactions will be reviewed and evaluated, with an emphasis on regulatory and antitrust issues surrounding M&A deals. Students will apply their acquired strategic M&A skills to relevant case studies and will compete in teams in an online simulation.

Family and Small Businesses

This course aims to provide an overview of current family business and the small business sectors. Students will evaluate and develop a diagnostic approach to the essentials and challenges of running and growing such businesses.

Sustainability and Entrepreneurship

This course focuses on the importance of environmental and social corporate governance to make a business sustainable and resilient in the long term.

Students will first examine the science of planetary boundaries, with a focus on climate change, biodiversity, food and health and other Sustainable Development Goals (SDGs). Students will then consider the evolving SDG landscape and how the new regulations as well as stakeholder engagement may impact corporate decisions. They will also learn about how to tackle a practical sustainability challenge by getting support, advice and feedback from others through group learning and peer-to-peer coaching. Students will develop a sustainable business plan for their company that takes into account the role of multiple stakeholders, including employees, customers, contractors and other key players who may influence positively or negatively the systemic transformation of their business practice. Students will also explore the key leadership skills and techniques necessary to develop their own resilience and that of their teams.

Field Trip

This business learning immersion is designed to complement in-class learning with practical experience. Students will discover start-ups and the innovative environment in a city. They will investigate the start-up ecosystem in a city, conducting specific research on the role of entrepreneurship, creativity and innovation in successful businesses. They will have the opportunity to visit established companies, start-ups and/or incubators. Students will prepare for the trip with team-building activities and research, including a quantitative overview of the companies, places and sectors involved, to combine theoretical and experiential learning.

SEMESTER 3 – BUSINESS RESEARCH PROJECT OR INTERNSHIP

SEMESTER DESCRIPTOR

Goal: To demonstrate the ability to plan and execute an independent research project within a defined time period or working in a placement for a duration of six months.

During the final semester, students will have the choice to opt for the Business Research Project or an internship.

If students opt for the Business Research Project, they will be required to produce an independent research project demonstrating advanced research skills, planning and self-management abilities, as well as agility in information handling.

If students choose to undertake a 6-month internship, they will undertake a placement and produce a reflective essay. Students will use a reflective model and an experiential learning cycle to examine their internship experiences, for them to develop their personal growth via self-reflection on practices at work and enhance their employability.

Internship

Students will further their professional development through their experiential learning and critical reflection. Students will use a reflective model and an experiential learning cycle to examine their internship experiences. They will reflect critically on these experiences and on relevant theoretical knowledge to create a new synthesis of theory and practice as a means of professional development.

Business Research Project

The business research project is a culminating academic research-based work that forms part of the Master's program. One-to-one and group tutoring is held on a regular basis, but the overall emphasis of the course is placed on self-regulated learning and research activities. Each student is required to develop, analyze, synthesize and discuss a business problem. The business research project can be based on an entrepreneurship, intrapreneurship, innovation, business development, hospitality concept or diagnostic review for an existing start-up or past organizational issue. Major findings need to be recapitulated and two solutions are drawn with evaluation and syntheses.

MSc in Real Estate, Finance and Hotel Development

This program is taught in the UK only with one start date in the Fall.

CONCEPT OF THE MASTER'S PROGRAM

The overall aim of the MSc program is to prepare students for accelerated careers in hospitality, real estate and financial services companies. The students will build upon prior education and experiences to further develop their analytical and managerial skills to meet the requirement of a demanding finance sector. Teaching and learning include transformative, didactic, experiential, student-focused, industry-based and technology supported approaches.

GRADUATE PROFILE

Glion Master's graduates are students with a background in hospitality management, finance and real estate. They will be able to analyze and compare real estate investment opportunities, apply technical proficiency with the industry's analytical tools and demonstrate the methodologies and skills necessary to deliver a hotel development or asset management real estate project. Graduates adopt transformative approaches and make informed customer-centered decisions in today's highly complex and rapidly evolving environment. At the managerial level, graduates take initiatives and accept accountability at operational and strategic levels in local and global contexts.

LEARNING OUTCOMES

Students upon graduation from the MSc program should be able to:

- Demonstrate an in-depth understanding of the international hospitality and real estate industries, combined with specialized financial skills that enable them to lead and execute hotel development projects, consulting assignments and investor mandates successfully
- Generate innovative development or alternative fund projects across real estate asset classes to address the variety of investors' needs by analyzing complex, unpredictable and volatile real estate and capital markets
- Provide and execute customized development and asset management solutions for a specific real estate project by assessing the value creation chain and the financial challenges in the hospitality real estate industry
- Evaluate and optimize the interests of all stakeholders in a real estate investment by implementing a wide range of market and feasibility analysis, transaction due diligence, risk-reward analysis and portfolio optimization
- Master management skills in highly complex and diversified businesses and make decisions considering the economical and financing perspectives in a responsible way, accepting full accountability for the outcomes
- Exhibit confident and effective interpersonal and communication skills in a range of complex and specialized contexts
- Constantly improve their own and others' performances through team efforts
- Develop as an effective industry professional through continuous reflection on experience in a systematic and balanced way

PROGRAM STRUCTURE

The MSc program is a 1.5-year program of study divided into units of study called 'courses' or 'modules', each of which is assigned a specific number of 'credits'. There are 36 credits attempted during the program of study and all courses or modules must be passed. All students are registered for an MSc in Real Estate, Finance and Hotel Development.

SEMESTER 1 – INTERNATIONAL HOTEL DEVELOPMENT AND ASSET MANAGEMENT AND REAL ESTATE INVESTMENT PART I

Required Courses	Credits
Hospitality Business Trends & Strategies	1
Hospitality Financial Analysis & Performance	2
Global Hotel & Resort Development	2
Hotel Asset Management	1
Negotiating Hotel Management Contracts	1
Global Real Estate Markets	1
Real Estate Finance Principles	2
Real Estate Valuation Methods	2
Institutional Investments in Real Estate	1
Business Research Methods	1
Total number of credits	14

SEMESTER 2 – REAL ESTATE INVESTMENT PART II AND INVESTMENT STRATEGIES & FINANCING

Required Courses	Credits
Real Estate M&A	1
Capital Markets	2
Portfolio Management	2
Advanced Financing & Fixed Income	2
Private Equity	1
Advanced Financial Modeling	1
Hotel Real Estate Investment Strategy	4
Sustainable Real Estate	2
Field Trip	2
Total number of credits	17

SEMESTER 3 – BUSINESS RESEARCH PROJECT OR INTERNSHIP

Required courses	Credits
Business Research Project or	5
Internship	
Total number of credits	5

Semester descriptors and course overviews

SEMESTERS 1 AND 2 – INTERNATIONAL HOTEL DEVELOPMENT AND ASSET MANAGEMENT AND REAL ESTATE INVESTMENT

SEMESTER DESCRIPTOR

Goal: To develop the analytical competencies and in-depth market understanding required for investment professionals in the real estate sector.

In this second pillar, students will be exposed to greater complexity to develop the strategic thinking and quantitative skills required of managers in volatile, uncertain and ambiguous situations. This may require integrating knowledge from several fields and contributing original and innovative thinking to problem solving and decision making. Subjects include global real estate markets, corporate finance principles, merger and acquisition, institutional investment and sustainability. At the end of this pillar, students are expected to be certified by HVS in hotel valuation methods and have completed training to use Argus for real estate development.

COURSE OVERVIEWS

Hospitality Business Trends & Strategies

This course provides an overview of the markets, business models and emerging trends in the global hospitality industry. Regional differences are also covered. Strategic management frameworks and analytical tools (SWOT, PEST, Porter Five Forces, VRIO) will be presented, selectively analyzed and applied to the hospitality industry based on case studies. Students will also review and discuss the current strategic orientations of hospitality firms and the consequences of major trends on the past and future of the industry.

Hospitality Financial Analysis & Performance

Focusing on the financial analysis of hotel operations, this course will provide students with a background in accounting and the use of financial statement analysis to assess financial position, cash flows and the profitability of the operations. The Uniform System of Account for the lodging industry will be defined and applied to case studies to assess the impact of different operational strategies. Key performance indicators (KPIs) will also be explained and put in practice, as they relate to the decision-making process. Emphasis will be put on the role and usage of market intelligence reports of competitive data such as HotStats.

Global Hotel & Resort Development

Real estate investors are increasingly focused on how to create value through hotel development. This course will introduce students to key approaches and tools used widely by hotel developers and feasibility analysts. It will include development strategy and process, concept development and market feasibility. The course will also highlight important differences between urban/resort hotels and considerations for hotel developers/advisors. Students will apply their learning through assignments to identify the optimal product combination, trends and financial drivers that contribute to a successful hotel development project.

Hotel Asset Management

Hotel Asset Management represents a key value driver of today's lodging investment with regards to the asset-light strategy of the largest hotel groups and to the variety of hotel investors' profiles. This course focuses on the challenges the hotel asset manager faces and the advanced techniques they use to create long-term value. It provides an overview of the different real estate asset classes and a framework of strategic levers for asset management. The asset management cycle, from the acquisition to the disposal of hotel properties and portfolios, will be defined, analyzed in-depth and applied to case studies.

Negotiating Hotel Management Contracts

This course will provide an insight into hotel expansion business models, such as management, franchises and lease agreements. It is aimed at unfolding key concepts and the analytical tools for negotiating hotel management contracts. The course includes extensive first-hand industry insights and analysis of critical contract provisions, operating models and recent trends in hotel management negotiations. Role-play simulations along with exhaustive briefings will provide students with the opportunity to become immersed in the role of a 'negotiator' in a pre-determined context. Additionally, students will apply negotiation theory to optimize management terms and critically assess the major terms and provisions areas in an owner-operator negotiation context.

Global Real Estate Markets

The Global Real Estate Markets course will review the global real estate universe and explain key differences that exist between different markets around the world. Concepts such as investible universe, transparency, liquidity, returns and volatility, direct versus indirect investing and manager selection and investment risk styles will be introduced in their respective context. Students will investigate the eight steps in successfully deploying an international real estate investment strategy. Real-life examples of global strategies will be discussed while students will put together a dummy global portfolio and stress-test it against credible market conditions. Students will also consider and discuss the key lessons learned from several decades of global real estate investing.

Real Estate Finance Principles

This course focuses on the theory and practice of the analytical tools needed for real estate finance professionals. It will review the time value of money concept and how it applies to the conventional methods of valuation in the real estate industry. The course will cover the theory and practice of capital budgeting decision making with the Net Present Value and Internal Rate of Return rules as the main real estate investment criteria. Finally, the course will review the foundations of asset pricing and portfolio theory.

Real Estate Valuation Methods

The course focuses on the valuation principles and techniques. All the steps required to conduct an appraisal are described in depth and applied to multiple case studies. The different valuation approaches will be defined and compared to determine when a method is the most suitable. A special emphasis will be put on the role of professional associations (RICS, Tegova) in developing ethics, professional responsibilities and industry standards. Students will also examine the role of the valuation in the real estate investment management process and analyze the consequences of expert-based valuations.

Institutional Investments in Real Estate

This course explores the fundamentals of global real estate investment from an institutional perspective. It will review the role of real estate in a multi-asset portfolio and discuss in detail investors' motivations, target allocation, correlation with other asset classes and expected risk/return profile. The investment process and strategies for structuring global real estate portfolios will be presented. Case studies will illustrate how an institutional investment manager may identify real estate investment opportunities under certain market conditions. Emphasis will be put on the role and responsibilities of the investment managers.

Sustainable Real Estate

This course provides an overview of how real estate investors and managers are tackling sustainability – arguably one of the most important strategic challenges and opportunities the industry has faced. Students will explore key concepts, tools and frameworks that are driving ESG (Environmental, Social and Governance) decision making among real estate industry stakeholders. The course will also cover innovation in construction and operations and the inter-relationship between creating long-term value and sustainable real estate.

Business Research Methods

The purpose of this course is to help students conduct applied research into management. It provides a great opportunity for students to establish or advance their understanding of research through the critical exploration of research language, ethical principles and methodology. Contents will include problem identification, research design strategies, reviewing the literature and the collection and analysis of field data. These skills are crucial for problem solving, decision making and strategic planning.

Real Estate M&A

This course considers how transactions in the hospitality real estate sector are implemented and the roles of specialist advisors in the transaction. It reviews the recent history of transactions, types of transactions and trends in investor communities. The transaction process and the many different advisors and their roles will be debated through group discussions. Recent case studies will also consider how to deal with common issues and challenges. The final part of the course provides greater insight into the structuring and funding options and how these impact the execution of deals.

Capital Markets

This course will provide an overview of the public capital markets in the context of global capital and economics and the alternative investment options. After covering the history, development and functioning of the key public markets, the course will look at how to interpret the information provided on equities and assess the investment proposition both theoretically and practically. Different investment instruments will be considered as well as the efficiency of the market. The course will then consider various approaches to assessing investments opportunities. The alternative investment markets will be covered as well as the main sources and drivers of capital. Finally, the course will consider the 'human' side or behavioral finance.

Portfolio Management

The Portfolio Management course will provide a detailed and thorough presentation of the Modern Portfolio Theory (MPT) and its practical use for individual and institutional investors. After the presentation of the portfolio risk diversification concept, the course will review the implementation of challenges and solutions faced by professionals with a particular focus on forecasting, multi-factor models and risk budgeting. A special emphasis will be put on the real estate sector and international portfolio diversification strategies.

Advanced Financing & Fixed Income

This course focuses on the determinants of fixed income markets. It covers topics pertaining to key risk factors for borrowers and lenders with regards to real estate finance and how these can be quantified. The role of central banks and monetary policy transmission channels in relation to real estate finance will be analyzed. A special emphasis is put on securitization and, in particular, on mortgage-backed securities and covered bonds as secured fixed income instruments. The course also assesses how real estate financing decisions are affected by current financial market regulation.

Private Equity

Understanding what private equity financing implies, delivers and does not provide is crucial, especially given the growing influence of this sector of the global economy. This course offers an overview of financing of the creation, development, growth, transmission and eventually restructuring of a company thanks to the private equity toolbox. As an emerging 'financial ecosystem' of its own, private finance raises many issues that will be considered, notably through business case studies. The class considers the place of private equity in asset allocation, fund structuring and management and divestments.

Advanced Financial Modelling

The course focuses on modeling in a spreadsheet the key areas addressed during the underwriting process: real estate capital stack structure, debt covenants, joint venture remuneration schemes, tenancy schedule terms and options and construction costs distribution. From the asset to the fund level, the course will rely on case studies to provide a comprehensive walk-through of the construction of a private equity real estate model. The course will also cover the modeling of risk analysis through sensitivities, Monte Carlo simulations and portfolio stress tests.

Sustainable Real Estate

This course provides an overview of how real estate investors and managers are tackling sustainability – arguably one of the most important strategic challenges and opportunities the industry has faced. Students will explore key concepts, tools and frameworks that are driving ESG (Environmental, Social and Governance) decision making among real estate industry stakeholders. The course will also cover innovation in construction and operations and the inter-relationship between creating long-term value and sustainable real estate.

Hotel Real Estate Investment Strategy

The purpose of this course is to immerse the students in the reality of the investment process, where they will mobilize all the in-class learning and be challenged to work at the level of industry professionals. Students will be required to create an event with appropriate professional guest speakers to showcase the process for the screening and due diligence for a real-life hotel and real estate asset purchase, how to design asset-level strategy to reach investors' objectives and how to structure the funding portfolio. The project to create the event will be organized in multiple stages with feedback at each milestone.

Field Trip

The field trip is designed to complement in-class learning with practical experience. Students will investigate the latest challenges of investing in hospitality real estate in emerging markets. Through a series of observation exercises, visits and 'meet-the-experts' sessions, students will conduct a comparative analysis of real estate investing in developed and emerging markets. They will also reflect on how industry professionals provide strategic advisory, valuation and transaction services and manage hospitality real estate assets and funds to create value for their investors in emerging countries.

SEMESTER 3 – BUSINESS RESEARCH PROJECT OR INTERNSHIP

SEMESTER DESCRIPTOR

Goal: To demonstrate the ability to plan and execute an independent research project within a defined time-period or working in a placement for a duration of six months.

If students opt for the Business Research Project, they will be required to produce an independent research project demonstrating advanced research skills, planning and self-management abilities, as well as agility in information handling.

If students choose a 6-month internship, they will undertake a placement and produce a reflective essay. Students will use a reflective model and an experiential learning cycle to examine their internship experiences, in order for them to develop their personal growth via self-reflection on practices at work and enhance their employability.

COURSE OVERVIEWS

Business Research Project

The business research project is a culminating academic research-based work that forms part of the Master's program. One-to-one and group tutoring are held on a regular basis, but the overall emphasis of the course is placed on self-regulated learning and research activities, in agreement with a selected company. Each student is required to develop, analyze, synthesize and discuss a business problem based on one of the major themes and concepts studied during the taught part of the program; the project can also be focused on a diagnostic review for an existing or past organizational problem. Major findings need to be recapitulated and different possible solutions are drawn with evaluation and syntheses.

Internship

Students will further their professional development through their experiential learning and critical reflection. Students will use a reflective model and an experiential learning cycle to examine their internship experiences. They will reflect critically on these experiences and on relevant theoretical knowledge to create a new synthesis of theory and practice as a means of professional development.

English Language Program

Intensive Hospitality English Language Program (IHELP)

CONCEPT OF THE IHELP PROGRAM

The Intensive Hospitality English Language Program (IHELP) is a five or six-week pre-sessional access program designed to enable students who do not have the required English entrance level to improve their English and attain the required standard. The program allows students to work on basic language competencies and specific hospitality English and study skills to prepare them for successful undergraduate and master's studies.

GRADUATE PROFILE

The educational aim of the program is for students to attain the level necessary to enter the undergraduate and master's programs.

IHELP enables students to integrate successfully into the Glion or Les Roches educational communities by providing an inclusive supportive program on the Glion or Les Roches campus. Students are introduced to basic hospitality concepts and hospitality-specific language.

LEARNING OUTCOMES

On successful completion of the IHELP program, students should be able to master English at a sufficient level and in accordance with the admissions requirements to be able to study on the undergraduate or master's programs successfully. They should be able to communicate appropriately, using both written and spoken English in hospitality and academic contexts to a professional standard.

They should also be able to apply a range of study skills, strategies and techniques to enable them to reach their full academic and professional potential.

PROGRAM STRUCTURE - IHELP FIVE OR SIX-WEEK PROGRAM (SWITZERLAND: FALL IN GLION AND SPRING IN LES ROCHES)

IHELP is a five or six-week pre-sessional program designed for students who need to improve their English to attain the entry level requirement and as an access pathway to the undergraduate or graduate programs.

Five or six-week program - IHELP	Total Hours
English Skills	18
English for Hospitality	18
Listening and Speaking	18
Reading and Writing	18
Skills for Academic Success	18
Culture and Tourism	18
Test Preparation	18
Total	126

Course overviews

IHELP FIVE OR SIX-WEEK PROGRAM

English Skills

The focus of this course is on the grammar and vocabulary used in professional contexts, preparing students for real-world communication. Students will analyze language in a variety of registers, forms and contexts and will improve their accuracy and fluency through a variety of communicative activities.

English for Hospitality

This course enables students to improve the accuracy and range of the English language skills they will need to study and work in the hospitality sector. They will work on acquiring hospitality-related vocabulary and developing professional communication skills through a variety of speaking and writing activities appropriate to the hospitality context.

Listening and Speaking

This course develops students' listening strategies and speaking skills in general and academic contexts. Language structures are reviewed and reinforced, while students will role play, make short presentations and develop confidence in speaking. They will also practice how to put forward their own point of view with evidence – encouraging the development of their critical skills.

Reading and Writing

This course develops students' reading strategies and writing skills in academic and general contexts. Language structures are reviewed and reinforced, while students will study reading texts and react to these in an appropriate written format. They will also practice how to put forward their own point of view with evidence – encouraging the development of their critical skills.

Skills for Academic Success

This course provides students with the core academic skills and language needed for further study. Students will listen to lecture extracts and take notes, develop reading strategies to understand longer academic texts and write academic papers (describing graphs, a process, data, presenting an opinion in an academic context, structuring an academic text, process writing, summarizing, paraphrasing and reviewing their own written work). Students will also learn to reference their sources according to APA style.

Culture and Tourism

This course explores the relationship between culture and tourism. Students consider ways of defining culture and how people relate to their own culture and that of others. The course seeks to develop awareness of cultural differences and encourages understanding of these differences and acceptance of others. Students relate this understanding to tourism and their perceptions of the needs of customers.

Test Preparation

This course prepares students to take the IHELP exit test by familiarizing them with the format and content of the test. Students analyze key language points and practice working with timed reading and listening comprehension exercises.

Admission requirements

Undergraduate programs

	Glion Switzerland	Glion UK
Minimum age	17.5 years old at the start of the program	
Education	Candidates must have completed senior secondary education with a diploma (IB Diploma, Maturité, Abitur, French Bac, A-Levels, High School Diploma or equivalent Senior Secondary Leaving Certificate).	
Admissions assessment	Personalized assessment to ascertain motivation and review application documentation. Includes scenario-based exercise to be completed beforehand	
Minimum English language entry requirements	<p>If English is not the candidate's first language, or if they have not spent the last two years studying* in a school where English is the primary language of instruction, they must provide a copy of one of the following:</p> <ul style="list-style-type: none"> • International English Language Test (IELTS)**: 5.5 overall (min. 5.0 in every sub-component) • Test of English as a Foreign Language (TOEFL): Internet-based 70 or paper-based 525 • First Cambridge Exam: Grade C 	<p>For London, all students (including EEA nationals) will need to undertake a Secure English Language Test (SELT) such as IELTS UKVI: 5.5 overall and min. 5.5 in every sub-component.</p> <p>Those without Student Route Visa requirements, same English Language requirements as Glion Switzerland.</p>

All English Language Test certificates must have been issued in the 12 months prior to admission.

*A valid English Language test certification may also be requested for visa purposes if requested by the authorities.

**Only tests taken/issued in an official IELTS testing center are accepted.

RECOGNITION OF PRIOR LEARNING AND THE ACCREDITATION OF PRIOR LEARNING (APL)

CREDIT TRANSFER PROCESS

Recognition of prior learning and the accreditation of prior learning (hereinafter referred to as APL) enhances educational and professional mobility and aims to broaden the opportunities for lifelong learning. The APL assessment is made on the basis that learning can be documented and the applicant can demonstrate the standard they achieved from participating in these activities is comparable to the standards in the program in which they are seeking credit. Learning may include relevant professional experience. The onus shall be on the applicant to provide evidence during the application process and prior to official admission that demonstrates relevant skills, academic level, knowledge and understanding. Glion recognizes some prior hospitality work experience as academic credit transfer onto the BBA program only. Application/request for credit recognition and transfer to GIHE will be made to Admissions, who will refer with the Academic Dean (or Program Director) to agree transferability and entry point. Requirements for the APL decision-making process are the following:

- An updated Curriculum Vitae
- Copy of passport
- Senior Secondary Education: an official copy of the final transcripts and an official copy of the Diploma/Leaving Certificate. If documents are not in English, then an official certified/notarized English translation is also requested.
- An official English language certificate (IELTS, TOEFL, FCE or CAE) equivalent to the program's entry requirements as per the GIHE website. Certificates cannot be older than 12 months from the day the certificate has been issued and the program starts.
- Previous studies: an official copy of all the transcripts (past semesters and current semester) from the institution the student attended.
- Academic catalog/program syllabus with course unit descriptions/hours/credits. Where GIHE has established credit precedents as identified through an approved articulation agreement, accompanying official documents may not be needed. All documents must be in English.
- An official work/or internship certificate or work contract. A diploma, a certificate or other documents certifying professional work experience learning including in-service training can also be sent (a job description, a directive on appointment to office, a professional certificate, a portfolio of or reference to work completed, etc.).

UNDERGRADUATE BBA PROGRAMS

Students who transfer to Glion Institute of Higher Education for the BBA programs are required to adhere to the following:

Academic credit transfer

- Academic credit transfer is recognized and granted by the Admissions Department, under the guidance of the Academic Dean and/or Program Director, prior to the student starting their studies with GIHE.
- A maximum of 82 credits towards a 120 credit BBA-based program can be transferred to GIHE with a minimum of 38 credits taken at GIHE in the final year of studies to include the specialization (semester 6 and 7).
- After the student has been admitted to the program, no request for credit transfer or exemption will be considered.

Work experience recognition:

- No more than semester 1 and 2 or a maximum of 20 academic credits can be recognized through previous hospitality-based work experience prior to admission to campus.
- Internship academic credit (semester 2 or 5 or a maximum of 10 credits) recognition may be granted by the appropriate panel on campus for students with extensive work experience in a relevant domain.
- For students seeking an early exit award during their program of study, work experience or non-collegiate learning may not be recognized to fulfil certification. Academic credit recognition for experiential or non-collegiate credits transfer at GIHE is limited to a maximum of 25% of the credit requirement. If a student's total credits are outside of these requirements, a student is eligible for a transcript of study and certificate of attendance only. No early exit award can be given.

MSc in International Hospitality Business

MSc in Luxury Management and Guest Experience

MSc in Hospitality, Entrepreneurship and Innovation

MSc in Real Estate, Finance and Hotel Development

	Glion Switzerland	Glion UK
Minimum age	21 years old at the start of the program	
Qualifications	Bachelor-level undergraduate degree in any subject*	
Minimum English language entry requirements	<p>If English is not the candidates first language, or they have not spent the last two years** studying in an institution where English is the primary language of instruction, they must provide a copy of one of the following:</p> <ul style="list-style-type: none"> • IELTS: overall 6.0 and min. 5.5 in every sub-component*** • TOEFL: Internet-based 80 or paper-based 550 • First Cambridge Exam: Grade A • Cambridge Advanced Exam: Grade C 	<p>For the MSc programs in London, all students (including EEA nationals) will need to undertake a Secure English Language Test (SELT) such as IELTS UKVI 6.0 overall and min. 5.5 in every sub-component.</p> <p>Those without Student Route Visa requirements, same English Language requirements as Glion Switzerland.</p>

*If a degree/transcript is not in English (for UK) or English, French, German or Italian (for Switzerland), an official certified/translated copy in English will be required.

**A valid English Language test certification may also be requested for visa purposes if requested by the authorities.

***Only tests taken/issued in an official IELTS testing center are accepted.

All English Language Test certificates must have been issued in the 12 months prior to program start.

RECOGNITION OF PRIOR LEARNING AND THE ACCREDITATION OF PRIOR LEARNING (APL)

CREDIT TRANSFER PROCESS

Recognition of prior learning and the accreditation of prior learning (hereinafter referred to as APL) enhances educational and professional mobility and aims to broaden the opportunities for lifelong learning. The APL assessment is made on the basis that learning can be documented and the applicant can demonstrate the standard they achieved from participating in these activities is comparable to the standards in the program in which they are seeking credit. Learning may include relevant professional experience. The onus shall be on the applicant to provide evidence during the application process and prior to official admission that demonstrates relevant skills, academic level, knowledge and understanding.

Glion recognizes some prior hospitality work experience as academic credit transfer onto the BBA program only. Application/Request for credit recognition and transfer to GIHE will be made to Admissions who will confer with the Academic Dean (or Program Managers) to agree transferability and entry point. Requirements for the APL decision-making process are the following:

- An updated Curriculum Vitae
- Copy of passport
- Senior Secondary Education: an official copy of the final transcripts and an official copy of the Diploma/Leaving Certificate. If documents not in English, then an official certified/notarized English translation is also requested.
- An official English language certificate (IELTS, TOEFL, FCE or CAE) equivalent to the program's entry requirements as per the GIHE website. Certificates cannot be older than 12 months from the day the certificate has been issued and the program starts.
- Previous studies: an official copy of all the transcripts (past semesters and current semester) from the institution the student attended.
- Academic catalog/program syllabus with course unit descriptions/hours/credits. Where GIHE has established credit precedents as identified through an approved articulation agreement, then accompanying official documents may not be needed. All documents must be in English.

- An official work/or internship certificate or work contract. A diploma, a certificate or other documents certifying professional work experience learning including in-service training can also be sent (a job description, a directive on appointment to office, a professional certificate, a portfolio of or reference to work completed, etc.).

MASTER'S MSc PROGRAMS

ACADEMIC CREDIT TRANSFER (APL)

Students who transfer to Glion Institute of Higher Education for the MSc programs are required to adhere to the following:

- Academic credit transfer is recognized and granted by the Admissions Department, under the guidance of the Academic Dean and/or Program Director, prior to the student starting their studies with GIHE.
- After the student has been admitted to the program, no request for credit transfer or exemption will be considered.

WORK EXPERIENCE RECOGNITION

- Internship credit recognition may be granted by the appropriate panel on campus for students with extensive work experience in a relevant domain. However, students exempted from internship will have to complete the capstone project.

Intensive Hospitality English Language Program (IHELP)
